

The safe & affordable install

Applicable for residential or light commercial installations

Wall Bracket SPECS QSWB1000

A Close Up:

Our wall bracket works great with mini split units & is slotted for quick mounting.

The QSWB 1000 is made of 14-gauge square, steel tubing which not only cuts down on vibration but is also able to hold up to 300 lbs.

The QSWB 1000 includes anti-vibration isolation using four 50-durometer rubber washers. It also incorporates galvanized hardware to secure the unit to the wall bracket.

Four spacer bars snap into place with a saddle on each end. The J-bar installs at 32" to 48" for the perfect fit.

4 multi-positional clips for side or bottom mounting is available.

3 Dimensionally Adjustable
Height: 16 1/2"
Depth: 22 1/4"
Width: 32" to 48"

Quick-Sling provides you with a non-swinging, solid platform that is quick, safe, stable and affordable.
