

Wall & Ceiling Pressure Pickup Ports & Temp./Pressure Pickup Combos

Features & Options

- Economical & Easy to Install
- Includes 80 Micron Filter
- Accommodates 1/8" I.D. to 5/32" I.D. Tubing

The Wall Pressure Pickup Port comes standard on a brushed stainless steel plate or in a Delta Style enclosure, both sized to fit a common 2" x 4" electrical box. A foam gasket seals the plate or enclosure to the wall. The Wall Plate and Delta Style Enclosure can be used for pressure alone or as a combination temperature sensor and port.

BAPI also offers a Ceiling Mount Square Cover that fits a standard 3/4" thick suspended ceiling tile and a rectangular version with a 2" x 4" electrical box.

The Low Profile Port is ideal for locations where aesthetics are as important as the pressure measurement. The only visible portion is a flush 7/8" dot on the wall. The built in surge damper smoothes out rapid variations in air pressure for a more stable reading.

Specifications

Environmental Operation Range:

Delta Style, Wall & Ceiling Plates
 Temp: 32 to 122 °F (0 to 50 °C)
 Humidity: 0% to 95% RH, non-condensing

Low Profile Port
 Temp: -40 to 185°F, (-40 to 85°C)
 Humidity: 0% to 100% RH, non-condensing

Material:

Delta Style & Low Profile:
 ABS Plastic, UL 94, V-0

Wall & Ceiling Plates: Stainless Steel

Ceiling Mount Pickup Installation

The Ceiling Mount pickup is designed to fit through a standard 3/4-inch thick ceiling tile. Cut a 5/8-inch hole in the tile and place the static pressure sensor on top of the tile with the filter extending through the hole. The filter should stick out slightly below the tile's room surface. Attach tubing to the barbed fitting on the back of the pickup port and run the tubing to the pressure sensor. An optional Junction Box is available for the cover to protect the barbed fitting.
