### linear slot ceiling diffusers

|                                                         |     |
|---------------------------------------------------------|-----|
| Modulinear - Aluminum.....                              | F15 |
| ML-37, -38, -39, -40, -TZ Slotted - Supply.....         | F15 |
| MLR-37, -38, -39, -40, -TZ Slotted - Return.....        | F15 |
| Dimensions.....                                         | F16 |
| Accessories.....                                        | F21 |
| Installations.....                                      | F22 |
| Linear Slot Performance Data.....                       | F24 |
| Return Performance Data for Plenum Applications.....    | F28 |
| Modulinear Narrow Tee - Aluminum.....                   | F30 |
| ML-37-NT, -38-NT, -39-NT, -40-NT Slotted - Supply.....  | F30 |
| MLR-37-NT, -38-NT, -39-NT, -40-NT Slotted - Return..... | F30 |
| Modulinear Diffuser Plenums - Steel.....                | F31 |
| MP-37, -38, -39, -40 Slotted - Supply.....              | F31 |
| MP-SP-37, -38, -39, -40 Slotted - Supply.....           | F31 |
| MPI-37, -38, -39, -40.....                              | F31 |
| Dimensions.....                                         | F32 |
| Installations.....                                      | F33 |
| Modulinear Plenum Performance Data.....                 | F34 |
| Modulinear - Lay-in.....                                | F47 |
| MLT-37, -38, -39, -40.....                              | F47 |
| Dimensions.....                                         | F48 |

### linear bar diffusers

|                                                                  |     |
|------------------------------------------------------------------|-----|
| Fixed Bars - Aluminum.....                                       | F49 |
| CT-480, -481 - 1/4" Spacing - 1/8" Bars - 0°/15° Deflection..... | F49 |
| CT-580, -581 - 1/2" Spacing - 1/8" Bars - 0°/15° Deflection..... | F49 |
| CT-540, -541 - 1/2" Spacing - 1/4" Bars - 0°/15° Deflection..... | F49 |
| Fixed Bars - Pencil Proof - Aluminum.....                        | F49 |
| CT-PP-0 - 1/16" Spacing - 1/32" Bars - 0° Deflection.....        | F49 |
| CT-PP-3 - 1/16" Spacing - 1/32" Bars - 30° Deflection.....       | F49 |
| Dimensions.....                                                  | F50 |
| Accessories.....                                                 | F53 |
| Installations.....                                               | F54 |
| Linear Bar Performance Data.....                                 | F55 |
| Pencil Proof Linear Bar Performance Data.....                    | F58 |

### linear louver diffusers

|                                            |     |
|--------------------------------------------|-----|
| Architectural - Adjustable - Aluminum..... | F60 |
| LL-1, LL-2.....                            | F60 |
| Dimensions.....                            | F61 |
| Accessories.....                           | F62 |
| Installations.....                         | F63 |
| Performance Data.....                      | F64 |

round ceiling diffusers

|                                                             |     |
|-------------------------------------------------------------|-----|
| Two Horizontal Discharge Patterns .....                     | F66 |
| TMR, TMR-AA .....                                           | F66 |
| Dimensions .....                                            | F67 |
| Performance Data .....                                      | F68 |
| Vertical to Horizontal Discharge Pattern - Adjustable ..... | F69 |
| TMRA, TMRA-AA .....                                         | F69 |
| Dimensions .....                                            | F70 |
| Performance Data .....                                      | F71 |
| Adjustable Heavy Duty - Steel .....                         | F72 |
| XC-310 .....                                                | F72 |
| Dimensions .....                                            | F73 |
| Performance Data .....                                      | F74 |
| Adjustable Vortex - Steel .....                             | F75 |
| V-1 .....                                                   | F75 |
| Dimensions .....                                            | F76 |
| Performance Data .....                                      | F77 |

perforated ceiling diffusers

|                                                          |      |
|----------------------------------------------------------|------|
| 1, 2, 3, or 4-Way Discharge Pattern .....                | F78  |
| PAS, PAS-AA - Adjustable .....                           | F78  |
| PAR, PAR-AA .....                                        | F78  |
| PDS - Adjustable .....                                   | F78  |
| PDR .....                                                | F78  |
| Dimensions .....                                         | F79  |
| PAS Performance Data .....                               | F83  |
| PDS Performance Data .....                               | F86  |
| PAS, PDS Performance Notes .....                         | F89  |
| PAR, PXP, PMR, PXP-DR, PDR Performance Data .....        | F89  |
| PAR, PXP, PMR, PXP-DR, PDR Performance Notes .....       | F89  |
| Return Panels .....                                      | F90  |
| PXP, PXP-AA .....                                        | F90  |
| PXP-DF .....                                             | F90  |
| Dimensions .....                                         | F91  |
| Star Pattern - Adjustable .....                          | F92  |
| PSS, PSS-AA .....                                        | F92  |
| PSS-DF .....                                             | F92  |
| Dimensions .....                                         | F93  |
| Discharge Patterns .....                                 | F95  |
| Performance Data .....                                   | F96  |
| Curved Blade - 1, 2, 3 or 4-Way Deflectors .....         | F97  |
| PCS, PCS-AA .....                                        | F97  |
| PCS-DF .....                                             | F97  |
| Dimensions .....                                         | F98  |
| Installations .....                                      | F100 |
| Performance Data .....                                   | F101 |
| Narrow Tee - Steel .....                                 | F103 |
| PAS-NT - Round Pattern .....                             | F103 |
| PAR-NT - Return .....                                    | F103 |
| PXP-NT - Return Panel .....                              | F103 |
| PSS-NT - Star Pattern .....                              | F103 |
| PCS-NT - Curved Blade .....                              | F103 |
| Dimensions .....                                         | F104 |
| Modular Core - 1, 2, 3 or 4-Way Adjustable - Steel ..... | F105 |
| PMC .....                                                | F105 |
| PMC-DF .....                                             | F105 |
| PMR .....                                                | F105 |
| Dimensions .....                                         | F106 |
| Performance Data .....                                   | F107 |

## square ceiling diffusers

|                                                                                |      |
|--------------------------------------------------------------------------------|------|
| High Performance .....                                                         | F109 |
| TMS, TMS-AA .....                                                              | F109 |
| Dimensions.....                                                                | F110 |
| Performance Data.....                                                          | F112 |
| High Performance - Horizontal to Vertical Discharge Pattern - Adjustable ..... | F114 |
| TMSA, TMSA-AA.....                                                             | F114 |
| Dimensions.....                                                                | F115 |
| Performance Data.....                                                          | F116 |
| Modular Core - 1, 2, 3 or 4-Way - Adjustable .....                             | F118 |
| MCD, MCD-AA .....                                                              | F118 |
| Dimensions.....                                                                | F119 |
| Performance Data.....                                                          | F121 |

## architectural ceiling diffusers

|                                                  |      |
|--------------------------------------------------|------|
| Square Plaque .....                              | F123 |
| OMNI, OMNI-AA .....                              | F123 |
| Dimensions.....                                  | F124 |
| Performance Data.....                            | F127 |
| Square Plaque, Narrow Tee.....                   | F129 |
| OMNI-NT, OMNI-AA-NT.....                         | F129 |
| Dimensions.....                                  | F130 |
| Round Plaque - Steel.....                        | F131 |
| R-OMNI .....                                     | F131 |
| Dimensions.....                                  | F132 |

### linear diffusers

#### ML / MLR

##### LINEAR SLOT CEILING DIFFUSER

- Ideal for continuous length applications
- Full 180° pattern controller adjustment
- Direction & volume of the discharged air can be adjusted gradually by moving the pattern controllers

#### CT

##### LINEAR BAR DIFFUSER

- Designed for heating or cooling applications
- Available in 8 different core styles as well as a wide selection of frames & borders
- Can be used in ceiling, side wall, sill or floor installations
- MRI compatible

#### LL

##### LINEAR LOUVER DIFFUSER

- Available in 1-way or 2-way discharge patterns
- Ideal for continuous length applications
- Designed for heating or cooling applications
- MRI compatible

#### ML-TZ / MLR-TZ

##### LINEAR SLOT CEILING DIFFUSER

- For use with Armstrong TechZone ceiling grids
- Modular length applications
- Full 180° pattern controller adjustment
- Direction & volume discharged air can be adjusted gradually by moving the pattern controllers

#### MP

##### MODULINEAR DIFFUSER PLENUM

- Designed specifically for field attachment of ML or MLR diffusers
- Standard nominal lengths are 24, 36, 48, & 60 inches
- Made from galvanized steel

#### MLT

##### MODULINEAR LAY-IN

- Modular version of the ML diffuser with an MP plenum
- Available in 2 and 4 foot module lengths
- Insulated or non-insulated plenum options
- Diffusers can be ordered without plenums

pages: F66-F77

## round ceiling diffusers

|                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                                                                                               |                                                                                                                                                                                                                                                                                                                                        |                                                                                                                                                                                                                                                             |

pages: F78-F108

perforated ceiling diffusers

PCS / PCS-AA / PCS-DF

CURVED BLADE DEFLECTORS

- 51% free area perforated face
- Can be adjusted before or after installation
- Discharge pattern can be adjusted from horizontal to vertical
- Provides excellent performance in variable air volume systems

PAS

ADJUSTABLE PATTERN CONTROLLERS

- 51% free area perforated face
- Provides tight, uniform, horizontal blanket of air that protects the ceiling against smudging
- Can be adjusted before or after installation
- Provides excellent performance in variable air volume systems

PSS / PSS-DF / PSS-AA

ADJUSTABLE STAR PATTERN

- 51% free area perforated face
- Generates high induction air pattern that maximizes throw
- Can be changed to either side blow or corner blow in the field

PMC / PMR

ADJUSTABLE MODULAR CORE

- 51% free area perforated face
- Adjustable to 1,2,3, or 4-way discharge pattern after installation
- Modular core sections are easily removable
- Provides excellent performance in variable air volume systems

PAR / PAR-AA

RETURN DIFFUSERS

- 51% free area perforated face
- Provides a matching appearance to supply diffusers

PXP / PXP-AA / PXP-DF

RETURN PANELS

- 51% free area perforated face
- Designed for return or exhaust applications
- Comprised of heavy gauge steel & aluminum

pages: F109-F122

## square ceiling diffusers

**TMS / TMS-A / TMSA / TMSA-AA**
**HIGH PERFORMANCE**

- Uniform 360° discharge pattern
- Designed to protect ceiling from streaking & smudging
- Available in steel or aluminum
- Provides excellent performance in variable air volume systems
- Available in fixed or adjustable pattern

**MCD / MCD-AA**
**ADJUSTABLE MODULAR CORE**

- Adjustable to 1, 2, 3, or 4-way discharge pattern after installation
- Modular core sections are easily removable
- Available in steel or aluminum
- Provides excellent performance in variable air volume systems
- Maintains horizontal flow pattern from maximum to minimum cfm

pages: F123-F157

architectural ceiling diffusers

OMNI / OMNI-AA

SQUARE PLAQUE DIFFUSER

- Uniform 360° horizontal air pattern
- Designed for architectural ceilings
- Available in steel or aluminum
- Provides excellent performance in variable air volume systems

R-OMNI

STEEL ROUND PLAQUE DIFFUSER

- Uniform 360° discharge pattern
- Designed for architectural ceilings & exposed ductwork
- For use in heating or cooling applications
- Provides excellent performance in variable air volume systems

OMNI-RS

STEEL ROUND PLAQUE DIFFUSER

- Delivers a tight 360° horizontal air pattern
- Designed for architectural ceilings
- Provides excellent performance in variable air volume systems

DAT

LOUVERED PLAQUE

- Smooth plaque face allows diffuser to harmonize with ceiling system
- Designed for architectural ceilings
- Provides excellent performance in variable air volume systems
- Easy connection to flexible duct

MB / MBR

MODU-BLOC SERIES

- Choice of 1, 2, 3, or 4-slots
- Flow pattern guards against ceiling smudging
- Discharge patterns are individually adjustable for each slot
- Easy connection to flexible duct

TSW

SWIRL FACE

- Delivers a tight 360° circular air pattern
- Designed for architectural ceilings
- Provides excellent performance in variable air volume systems

SPECTRUM

CURVED PANEL PLAQUE FACE

- Center appliqué available in nine standard colors
- Provides a tight 4-way horizontal air discharge pattern
- Can be used for retrofit applications with perforated diffusers

pages: F158-F198

square & rectangular ceiling diffusers

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

combination supply / return ceiling diffuser

CSR / CSR-P

#### COMBINATION SUPPLY / RETURN

- Supply & return air are handled through one air device
- Compatible with unitary package units
- High capacity with long throws

## Overview

## diffusers

### LINEAR DIFFUSERS

Linear diffusers are long, narrow outlets that can be installed in multiple sections to achieve the appearance of one continuous length. Linear diffusers are also available to fit in modular ceiling systems. This family of diffusers has superior architectural appearance and is excellent for applications such as long corridors, large public areas, perimeter zones of offices and large exterior glass areas found in entrances and atriums.

- FlowBar Linear Diffusers (Model FL)
- Linear Slot Ceiling Diffusers (Model ML)
- Linear Bar Diffusers (Model CT)
- Linear Louver Diffusers (Model LL)
- Armstrong Techzone Ceiling Diffusers (Model ML-TZ)

### ROUND CEILING DIFFUSERS

Titus round ceiling diffusers are available in a broad range of sizes. These devices are typically installed in sheet rock or exposed duct. Titus round diffusers are available with adjustable deflectors that allow the option for either horizontal or vertical flow. With their high capacity design, round ceiling diffusers are an excellent selection for gymnasiums, atriums, industrial facilities, and large retail stores.

- 2 Horizontal Pattern (Model TMR)
- Horizontal to Vertical Pattern (Model TMRA)
- Heavy Duty Adjustable (Model XC-310)
- Vortex Diffuser (Model V-1)
- Architectural Round (R-OMNI)

### PERFORATED CEILING DIFFUSERS

Perforated ceiling diffusers are typically selected to meet architectural demands for air outlets that blend into the ceiling plane. Features include perforated face with 51% free area, round or square inlets, and multiple mounting options. Titus perforated diffusers can be selected with round or cross flow discharge patterns to maximize capacity or throw.

- Adjustable curved blade deflectors (Model PCS)
- Stamped pattern controllers (Model PAS)
- Star pattern (Model PSS)
- Modular core (Model PMC)
- Matching return with backpan (Model PAR)
- Matching return, perforated face only (Model PXP)

### SQUARE CEILING DIFFUSERS

Titus square diffusers are designed to maximize engineering performance. This family of products includes the TMS fixed pattern diffuser, TMSA adjustable pattern diffuser, and the MCD modular core diffuser. All models are available in steel or aluminum construction and multiple mounting options. Titus square ceiling diffusers are an excellent choice for VAV (variable air volume) applications.

- High performance (Model TMS)
- High performance, adjustable pattern (Model TMSA)
- Modular Core, (Model MCD)

### ARCHITECTURAL CEILING DIFFUSERS

Titus architectural diffusers are high performance products designed to provide a pleasing architectural appearance. These diffusers provide a tight horizontal ceiling pattern maximizing room air induction and

comfort in the occupied space. They are an excellent choice for architects, engineers and design professionals who want to maximize performance and aesthetics in an air outlet.

- Square Plaque Diffuser (Model OMNI)
- Round Plaque Diffuser (Model R-OMNI)
- Square Backpan, Round Plaque Diffuser (Model OMNI-RS)
- Louvered with Plaque Face Diffuser (Model DAT)
- Modu-Bloc Diffuser, Adjustable (Model MB)
- Curved Plaque Face Diffuser (Model Spectrum)

### SQUARE & RECTANGULAR CEILING DIFFUSERS LOUVERED FACE

Titus square and rectangular ceiling diffusers feature an aesthetically pleasing, louvered face design. These diffusers are available in 1-, 2-, 3- or 4-way airflow discharge patterns which provides a high level of flexibility in any design application. The units also offer an architecturally pleasing appearance with the diffuser face flush with the ceiling surface. All models are available in steel or aluminum construction and multiple mounting options.

- Louvered Face, Square, Rectangular, or Round Neck Inlet (Model TDC)
- Louvered Face, Square, Rectangular, or Round Neck inlet, Induction Vanes (TDV)
- Louvered Face, Square, Rectangular, or Round Neck inlet, Induction Nozzles (TDX)

## SQUARE AND RECTANGULAR CEILING AND SIDE WALL DIFFUSERS

Square and rectangular ceiling and side wall diffusers can be applied to areas requiring directional patterns. The adjustable curved blades on the face of the 250 diffuser allow adjustment of the discharge airflow pattern from vertical to horizontal thereby providing maximum for ceiling or sidewall applications. The Titus TBF-AA TurboFuser features concentric round cones that provide superb aesthetics and is great for applications requiring spot cooling or heating control.

- Curved blades, adjustable discharge pattern (Model 250)
- Spot Heating and Cooling (Model TBF-AA TurboFuser)
- Spot Heating and Cooling (Model TND-AA Nozzle Diffuser)

## COMBINATION SUPPLY / RETURN CEILING DIFFUSER

Titus combination supply/return diffusers are designed for use with unitary roof top package systems. The CSR model features a combination supply/return diffuser face and no distribution plenum. The supply section of the face is constructed with louver blades to provide maximum performance with a flush face design. The return section in the center

utilizes the 50F eggcrate core to maximize the return air performance. The CSR-P model features the same face design but includes a distribution plenum. Titus combination supply/return diffusers are compatible with unitary equipment from 2-½ to 25 tons.

## CEILING DIFFUSERS FOR SPECIAL CEILING GRID DESIGNS

Narrow Tee, boltslot, TechZone, and regressed tile ceilings are just a few examples of the special ceiling grid types being offered today. Titus has a complete line of diffusers that are designed to integrate with these different ceilings types and maintain superior aesthetics and performance.

## APPLICATION ICONS KEY

for use in retrofitting older products into modern designs & systems

retrofit

additional finish options available for HVAC products that resemble realistic woodgrains, and adds high-end detail quality to any application

woodgrains

for use in factories, warehouses, shopping malls and other large open spaces where long throws are required

factories

suitable for foyers, waiting rooms and other areas with recessed lighting fixtures

recessed lighting

can be used in open ceiling environments

open ceiling

great for areas where the conditioned space is large and the ductwork is unable to be brought closer to the occupants

open areas

for use in MRI environments & will not significantly affect the diagnostic information

MRI compatible

contributes toward energy savings by reducing operating costs of air distribution devices

energy solutions

mounts directly to ductwork

duct mounted

Diffuser module sizes are hard metric & inlets are soft. Metric linear and grille products are converted to the nearest ¼" for ordering. Contact us for more information.

# Linear Slot Ceiling Diffusers

diffusers

## ML / MLR / ML-TZ

- Titus modulinear diffusers are designed for variable air volume systems. They project a uniform blanket of air that adheres to the ceiling even at low flow rates.
- Both the direction and volume of the discharge air can be adjusted gradually by moving the pattern controllers (see diagrams below)
- Full 180° pattern controller adjustment means there are no "lefts" or "rights." Specifying, ordering, and installing are simplified.
- Model MLR returns are the same as the Model ML supply diffusers except that the pattern controllers are omitted.
- Choice of borders and mounting frames for various types of installations
- Available with one to eight slots
- Ideal for continuous length applications. Multiple sections are shipped with required alignment strips or pins for field installation.

### AVAILABLE MODELS:

#### Supply Models:

ML-37 / 1/2" Slot  
ML-38 / 3/4" Slot  
ML-39 / 1" Slot  
ML-40 / 1 1/2" Slot  
ML-TZ / 3/4" Slot

#### Return Models:

MLR-37 / 1/2" Slot  
MLR-38 / 3/4" Slot  
MLR-39 / 1" Slot  
MLR-40 / 1 1/2" Slot  
MLR-TZ / 3/4" Slot

### FINISHES

Standard Finish - #26 White border. Black pattern controllers  
Optional Finish - Anodized finishes available

### OVERVIEW

Modulinear / Aluminum

The Titus ML Modulinear diffuser is a high performance, high quality linear slot diffuser. The unique "ice tong" deflector blades allow both changes in air volume and direction from the face of the diffuser. This diffuser is also available in 1 through 8-slot configurations with the exception of the ML-40, which is available in 1 through 4-slot configurations.

### ADDITIONAL FEATURES

- Maximum one piece section is 6 feet. Lengths greater than 6 feet are furnished in multiple sections
- Optional Model MLF and MLRF diffusers are designed for field cutting to length and are furnished in 6-foot sections
- Maximum pattern controller length is 3 feet. Pattern controllers are furnished in multiple sections for a diffuser longer than 3 feet.
- Mounting frames are cut to length and assembled in the field
- Material is extruded aluminum with steel pattern controllers
- Optional curving to a 6-foot minimum radius available for architectural enhancement (fixed blades only)

ML / MLR UNIT DIMENSIONS

## ACCESSORIES

## diffusers

### FIELD CUT DIFFUSERS

#### Available Supply Models:

MLF-37 / 1/2" Slot  
MLF-38 / 3/4" Slot  
MLF-39 / 1" Slot  
MLF-40 / 1 1/2" Slot

#### Available Return Models:

MLRF-37 / 1/2" Slot  
MLRF-38 / 3/4" Slot  
MLRF-39 / 1" Slot  
MLRF-40 / 1 1/2" Slot

- Ideal when the exact length of an ML or MLR diffuser is not known until it is being installed
- Standard factory cut diffusers can be trimmed up to 6 inches. If more than 6 inches are to be removed, use the optional field cut diffuser.
- The field cut ML or MLR diffuser is 72 inches long, with the sides pre-punched to assure the proper alignment of field installed spacers. These field installed spacers provide additional rigidity during and after cutting.

### MITERED CORNERS

#### Available Models:

MC-37 / 1/2" Slot  
MC-38 / 3/4" Slot  
MC-39 / 1" Slot  
MC-40 / 1 1/2" Slot

#### DIMENSIONS FOR 90° MITERED CORNERS

| No. of Slots | 1A, 1B                          |    | 2A, 4, 7A                      |    | 2B, 7B                         |    | 3, 6, 11                       |    | 9A                              |    | 9B                               |    | 12, 15 |    | 22                              |    |

| 3-8          | 24 <sup>7</sup> / <sub>16</sub> | 24 | 24 <sup>3</sup> / <sub>8</sub> | 24 | 24 <sup>1</sup> / <sub>8</sub> | 24 | 23 <sup>7</sup> / <sub>8</sub> | 24 | 24 <sup>5</sup> / <sub>16</sub> | 24 | 24 <sup>11</sup> / <sub>16</sub> | 24 | 24     | 24 | 25 <sup>3</sup> / <sub>16</sub> | 24 |

Note: Dimensions shown will vary for other angles

### PLENUMS

#### Available Uninsulated Models:

MP-37 / 1/2" Slot  
MP-38 / 3/4" Slot  
MP-39 / 1" Slot  
MP-40 / 1 1/2" Slot  
MP-37-SP / 1/2" Slot  
MP-38-SP / 3/4" Slot  
MP-39-SP / 1" Slot  
MP-40-SP / 1 1/2" Slot

#### Available Insulated Models:

MPI-37 / 1/2" Slot  
MPI-38 / 3/4" Slot  
MPI-39 / 1" Slot  
MPI-40 / 1 1/2" Slot  
MPI-37-SP / 1/2" Slot  
MPI-38-SP / 3/4" Slot  
MPI-39-SP / 1" Slot  
MPI-40-SP / 1 1/2" Slot

### BLANK-OFFS

BLKS / Cold Rolled Steel  
/ Fits over Neck  
/ Black Finish  
BLKV / Vinyl  
/ Fits in Slot  
/ Black Finish

## MOUNTING FRAME ASSEMBLY

Note: Mounting frame is used only on Frame & Border Types 3, 4, 6, 7A, 7B, 11. Shipped with mill finish.

- Mounting frame for Titus Modular diffusers assures a clean, accurately dimensioned ceiling opening to receive the diffuser
- Choice of designs for wet plaster and other types of ceilings
- Allows the diffusers to be unpacked and installed after construction is finished
- Diffusers can be removed and replaced easily, without disfiguring the ceiling
- Furnished with the diffusers in Frame & Border Types 3, 4, 6, 7A, 7B and 11
- Cut to length in the field

- Diffusers can be joined together end-to-end to form long, continuous slots
- End borders and end caps close off the ends of the diffusers and simplify installations ending at walls and other stopping points (see page F17)
- Factory-made mitered corners are accurately welded and carefully finished for a smooth, unbroken corner treatment. Mitered corners are rendered inactive with factory-installed blank-offs. (see page F20)
- Alignment pins maintain close joints between sections

(Border 22)  
Align Y-Y ends using supplied SS1 Spline Support Clips

- Do not screw support clips into side of diffuser. The screws may interfere with adjustment of the diffuser blades.
- Always allow for expansion and contraction per the Grilles and Diffusers Engineering Guidelines section of the Catalog

Factory Cut Diffuser (Trimming)

- Titus Modulinear diffusers are so simple and rugged they are routinely cut to length in the field with a fine tooth, high-speed carbon steel metal cutting blade
- Factory-cut diffuser Model ML (above) or MLR is ordered for a specified length from the factory, but can be trimmed as much as 3 inches from each end in the field

Field Cut Diffuser

- Field-cut diffuser Model MLF (above) or MLRF is shipped in standard 6-foot lengths
- Model MLF or MLRF diffuser can be cut to any length. Field-installed spacers and other hardware are furnished with the diffuser for one field cut. Additional field cut kits are available at additional cost.
- Unit is shipped without end caps or end borders

Hanger Bracket  
for Border Types 9A, 9B, 12, 15

These hanger brackets are a convenient means of attaching hanger wires to support the diffuser from the structural members of the building.

Hanger Bracket  
for Border Types 2A, 2B

Here the diffuser is simply pushed up into the duct until the outer legs of the hanger brackets snap into the hems of the duct. Screws then snug the diffuser against the ceiling.

Hanger Bracket  
for Frame & Border  
Types 3, 4, 6, 7A, 7B, 11

For installation in a Titus mounting frame, these hanger brackets function like the duct type brackets at the left. The outer legs of the brackets engage the side rails of the mounting frame.

ML-37 / 1/2" SLOT SPACING WIDTH / SUPPLY WITH CONTINUOUS PLENUM

NC corrections for various diffuser lengths

| Length | 2  | 4  | 6  | 8  | 10 |
|--------|----|----|----|----|----|
| Supply | -3 | 0  | +2 | +3 | +5 |
| Return | 0  | +3 | +5 | +6 | +8 |

Throw correction multiplier for length

| Length           | 2    | 4   | 8   | 10  |
|------------------|------|-----|-----|-----|
| Throw Correction | 0.72 | 1.0 | 1.5 | 1.7 |

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the engineering section of this catalog for additional information.
- Horizontal throw values given are for terminal velocities of 150, 100 and 50 fpm
- Throw values given are for isothermal conditions, and are based on 4-foot active section. For other lengths, see the Throw Correction Table.
- Pressure is given in inches of WG for ML only
- Vertical throw values are given for terminal velocities of 50 fpm
- For divided throw, use the cfm-per-foot value for the number of slots in each direction. For sound, use the NC values for cfm-per-foot for the total number of slots.

- Each NC value represents the noise criteria curve which will not be exceeded by the sound pressure in any of the octave bands, 2nd through 7th, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- For vertical throw, deduct 11 NC
- Dash (-) in space denotes an NC value of less than 10
- NC is based on 4-foot lengths; for other lengths use the NC correction table
- Throws listed are for the 1-way pattern. For divided airflow, select the airflow in each direction according to the number of slots aimed in that direction, with the total airflow apportioned between slots. For an explanation of catalog throw data, see the Engineering Guidelines section of the catalog.
- Data obtained using plenums with duct velocities less than 800 fpm. See pages F34-F45 for data with Titus plenums.
- For continuous lengths it is recommended that maximum active lengths are no longer than 10 feet

Throw correction table for lengths

| ML-40 length (ft) | 2    | 4    | 6    | 8    | 10   |
|-------------------|------|------|------|------|------|
| Correction factor | 0.40 | 0.83 | 1.00 | 1.15 | 1.29 |

NC correction table for lengths

| ML-40 length (ft) | 2  | 4  | 6 | 8  | 10 |
|-------------------|----|----|---|----|----|
| Correction factor | -6 | -2 | 0 | +2 | +3 |

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. Refer to the engineering section of the catalog for additional information.
- Throw values given are for isothermal conditions, and are based on 6-foot active section. For other lengths, see the Throw Correction Table.
- Horizontal throw values given are for terminal velocities of 150, 100 and 50 fpm
- Vertical throw values given are for terminal velocity of 50 fpm
- Throws listed are for the 1-way pattern
- For divided throw, use the cfm-per-foot value for the number of slots in each direction. For sound, use the NC values for cfm-per-foot for the total number of slots.
- Pressure is given in inches of water gauge (WG)
- Each NC value represents the noise criteria curve which will not be exceeded by the sound pressure in any of the octave bands, 2nd through 7th, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- For vertical throw, deduct 11 NC
- Dash (-) in space denotes an NC value of less than 10
- NC is based on 6-foot lengths. For other lengths use the NC correction table above.
- Data was obtained using plenums with duct velocities less than 800 fpm. See pages F34-F45 for data with Titus plenums.
- For continuous lengths, a one foot blankoff should be used in between every 6 foot active section. A two foot blankoff should be used in between 10 foot active sections. Active sections should not exceed 10 feet without a blankoff.
- For continuous lengths it is recommended that maximum active lengths are no longer than 10 feet

### RETURN PERFORMANCE DATA FOR PLENUM MLR-37 APPLICATIONS

- All pressures are in inches of water
- NC values are based on a room absorption of 10 dB, re 10<sup>-12</sup> watts, with a 10-foot active diffuser section (see the table below)
- Dash (—) in space denotes NC value less than 10
- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006
- For continuous lengths it is recommended that maximum active lengths are no longer than 10 feet

## NC correction table for lengths

| ML-40 length (ft) | 2  | 4  | 6 | 8  | 10 |
|-------------------|----|----|---|----|----|
| Correction factor | -6 | -2 | 0 | +2 | +3 |

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006
- Pressure is given in inches of water gauge (WG)
- NC values are based on a room absorption of 10 dB, re  $10^{-12}$  watts, with a 10-foot active diffuser section. For other lengths, refer to the NC correction table above.
- Dash (-) in space denotes an NC value of less than 10
- For continuous lengths it is recommended that maximum active lengths are no longer than 10 feet

## ML-NT / MLR-NT

- The ML Modulinear diffuser is a high performance, high quality linear slot diffuser. The unique “ice tong” deflector blades allow both changes in air volume and direction from the face of the diffuser.
- Available in one to eight slots
- Available in 24" or 48" lengths
- Made of extruded aluminum with steel deflectors

ML-NT / MLR-NT

### AVAILABLE MODELS:

#### Supply Models:

ML-37-NT / ½" Slot  
 ML-38-NT / ¾" Slot  
 ML-39-NT / 1" Slot  
 ML-40-NT / 1½" Slot

#### Return Models:

MLR-37-NT / ½" Slot  
 MLR-38-NT / ¾" Slot  
 MLR-39-NT / 1" Slot  
 MLR-40-NT / 1½" Slot

### FINISH

Standard Finish - #26 White

### OVERVIEW

Modulinear Narrow Tee / Aluminum

ML-NT diffusers are compatible with 24" x 24" modules for regressed narrow tee ceiling systems. The Titus ML Modulinear is a high performance, high quality linear slot diffuser. The unique “ice tong” deflector blades allow both changes in air volume and direction from the face of the diffuser.

For Performance Data and Notes, please refer to pages F24-F27 for models (ML-37-NT, ML-38-NT, ML-39-NT; ML-40-NT) and pages F28-F29 for models (MLR-37-NT, MLR-38-NT, MLR-39-NT, and MLR-40-NT).

See website for Specifications

## MP / MPI

- Titus Series MP plenums are designed specifically for field attachment of ML or MLR Modulinear diffusers
- Utilizes the Modulinear diffuser's excellent variable air volume performance. The air stays on the ceiling in a tight, horizontal pattern, even at low volumes.
- Widths available to fit all Models ML and MLR Modulinear diffusers
- Standard nominal lengths are 24, 36, 48, and 60 inches
- End caps can be turned up to allow plenums to be installed on continuous runs of ML diffusers
- Optional internal insulation (MPI and MPI-SP models)
- Optional field mounted inlet dampers are available
- Material is galvanized steel

MP / MPI

### AVAILABLE MODELS:

#### Models:

MP-37 / ½" Slot  
MP-38 / ¾" Slot  
MP-39 / 1" Slot  
MP-40 / 1½" Slot

#### Special Performance Models:

MP-37-SP / ½" Slot  
MP-38-SP / ¾" Slot  
MP-39-SP / 1" Slot  
MP-40-SP / 1½" Slot

MPI-37 / ½" Slot  
MPI-38 / ¾" Slot  
MPI-39 / 1" Slot  
MPI-40 / 1½" Slot

### OVERVIEW

#### Modulinear Diffuser Plenums / Steel

The Titus MP is an optional plenum for use with the ML modulinear series. When combined with the ML diffuser the MP provides a tight horizontal air pattern that clings to the ceiling even at low volumes.

See pages F34-F46 for further explanation of the MP-SP performance

See website for Specifications

### ADDITIONAL FEATURES

- Optional MP-SP models maximize air diffusion by shortening the throw and widening the spread of the discharge air. This is accomplished by internal baffling. The result is improved short-throw applications.
- With the air directed against an outside wall, the ML diffuser mounted in an MP-SP allows effective handling of the thermal load by thoroughly blanketing the wall or window surface

### MODULINEAR DIFFUSER PLENUMS

#### Available Models:

MP-37  
MP-38  
MP-39  
MP-40  
MPI-37  
MPI-38  
MPI-39  
MPI-40

- Data is valid only for Titus ML linear diffusers with Titus supplied MP plenums
- Data was obtained from testing in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance with flexible duct inlet may vary in the field. See the Engineering Guidelines section for additional information.

- NC values were determined from octave band 2 thru 7 sound power levels with a 10 dB room absorption
- Pressures are in inches WG
- Throw values are listed for terminal velocities of 150, 100 and 50 fpm under isothermal conditions. For an explanation of catalog throw data, see the Engineering Guidelines section of this catalog.
- Throw values listed are for the one-way air pattern. For divided airflow, select the airflow in each direction according to the number of sides aimed in that direction, with the total airflow apportioned between slots.

### SPECIAL PERFORMANCE

#### Available Models:

MP-37-SP  
MP-38-SP  
MP-39-SP  
MP-40-SP  
MPI-37-SP  
MPI-38-SP  
MPI-39-SP  
MPI-40-SP

- Data is valid only for Titus ML linear diffusers with Titus supplied MP-SP plenums
- Pressures are in inches WG
- Data was obtained from testing in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance with flexible duct inlet, may vary in the field. See the Engineering Guidelines section for additional information.

- NC values were determined from octave band 2 thru 7 sound power levels with a 10 dB room absorption
- Spread can be determined by multiplying the throw by 0.5
- Throw values are listed for terminal velocities of 150, 100 and 50 fpm under isothermal conditions. For an explanation of catalog throw data, see the Engineering Guidelines section of this catalog.
- Throw values listed are for the one-way air pattern. For divided airflow, select the airflow in each direction according to the number of sides aimed in that direction, with the total airflow apportioned between slots.

## MLT

- Nominal diffuser lengths are 2 and 4 feet
- Diffuser material - extruded aluminum
- Plenum - steel

MLT

### AVAILABLE MODELS:

#### Supply Models:

MLT-37 / ½" Slot  
 MLT-38 / ¾" Slot  
 MLT-39 / 1" Slot  
 MLT-40 / 1½" Slot  
 MLTI-37 / ½" Slot  
 MLTI-38 / ¾" Slot  
 MLTI-39 / 1" Slot  
 MLTI-40 / 1½" Slot

#### Return Models:

MLTR-37 / ½" Slot  
 MLTR-38 / ¾" Slot  
 MLTR-39 / 1" Slot  
 MLTR-40 / 1½" Slot  
 MLTRI-37 / ½" Slot  
 MLTRI-38 / ¾" Slot  
 MLTRI-39 / 1" Slot  
 MLTRI-40 / 1½" Slot

[See website for Specifications](#)

### FINISH

Standard Finish - #26 White border

### OVERVIEW

#### Modulinear / Lay-in

The Titus MLT supply diffuser is specifically designed for standard and narrow tee lay-in applications. The MLT is a supply diffuser and plenum, available in 24 and 48 inch nominal lengths and 1 through 4 slots. The plenums are available in nominal oval inlet sizes of 6 through 12 inches. The MLT features the unique "ice tong" deflector blades that allow both changes in air volume and direction from the face of the diffuser.

### BORDER NT

### CT

- When both appearance and performance are of prime importance in an air distribution system, Titus linear bar diffusers are a logical choice
- Designed for both heating and cooling applications, supply as well as return
- Available in eight different core styles plus a wide selection of frames and borders
- Can be selected for ceiling, side wall, or sill installations. Heavy duty models (Frames 5 and 6) are designed especially for typical floor installations.
- Accessories such as directional blades, dampers, blank-offs, access doors and mitered corners make these diffusers even more versatile
- Ideal for continuous length applications. Multiple sections are shipped with required alignment strips or pins for field installation.

### AVAILABLE MODELS:

#### 1/4" Spacing

- CT-480 / 1/8" Bars / 0° Deflection
- CT-481 / 1/8" Bars / 15° Deflection

#### 1/2" Spacing

- CT-580 / 1/8" Bars / 0° Deflection
- CT-581 / 1/8" Bars / 15° Deflection
- CT-540 / 1/4" Bars / 0° Deflection
- CT-541 / 1/4" Bars / 15° Deflection

#### 7/16" Spacing

- CT-PP-0 / 7/32" Bars / 0° Deflection
- CT-PP-3 / 7/32" Bars / 30° Deflection

### FINISHES

Standard Finish - #26 White

Optional Finishes - #01 Aluminum / #04 Mill / #25 Off White / #84 Black

Anodized finishes available

### OVERVIEW

Fixed Bars / Pencil Proof-Aluminum

When both appearance and performance are of prime importance in an air distribution system, Titus linear bar diffusers are a logical choice. Designed for both heating and cooling applications, supply as well as return.

See website for Specifications

### ADDITIONAL FEATURES

- Maximum one piece section is 6 feet. Lengths greater than 6 feet are furnished in multiple sections.
- Sections can be joined together end-to-end for continuous appearance, using standard alignment strips or alignment wires
- All deflection bars are fixed and parallel to the long dimension
- Fixed bars and support bars are extruded aluminum
- Optional curving to a 2' feet (24" minimum radius) on most models, available for architectural enhancement

Note: If placing furniture on cores, furniture legs should be a minimum of core spacing plus two bars wide to avoid placing a horizontal load on cores. Maximum duct width available is 12".

### CORE ONLY OPTION

S = 9" maximum support bar spacing  
D = 72" maximum for one piece  
Core Only is an option available for field framing  
Standard widths are as shown  
See page F51 for core details. Core will ship 3/4" smaller than the duct width.

### ALIGNMENT STRIPS

Used with border width 1/2" or wider. Alignment pins used with 1/4" borders.

### AVAILABLE FASTENINGS

#### Type A

- Screw Holes

For ceiling, side wall, sill, or floor. Used with Frame & Border Types 1B, 5, 11, 12, 13, 14.

#### Type B

- Spring Clip

For sill installations. Used with Frame & Border Types 11, 12, 13, 14. Must use AG-35B Damper instead of AG-35.

#### Type C

- Concealed Fastening

For ceiling, side wall, or sill. Used with Frame and Border Types 1A, 1B, 2, 3, 4, 7, 11, 12, 13, 14, & Border Type 22

### ADDITIONAL REINFORCING (Optional) (Except frame types 5 and 6)

#### Type H - Optional Heavy Duty Core (Note)

Optional Heavy Duty Core has support bars on 6" maximum centers. (Standard core has 9" maximum centers.) See maximum floor loading shown above.

Note: Frame types 5 and 6 have support bars on 6" centers as standard.

#### Type CC-Core Clip Option

All dimensions are in inches

#### Notes:

- Used without spring latch in Frame & Border Types 3 and 4.
- Not for use with Cores CT-480 and CT-481 (1/4" bar spacing). Screwdriver will not fit between bars.

Model AG-30 Single Blade Damper

For Model CT diffuser widths 2" through 4". Friction hinge on 2" widths. Screwdriver operator on 2 1/2" through 4". Cannot be attached to Frame and Border Types 3, 4, 5, or 6. For those types use Model AG-35B damper on diffusers 3" and wider.

Model 07 Directional Blades

For all widths of Model CT diffusers 3" or greater. Cannot be attached to Frame and Border Types 3 and 4. Can be used with Type 5 or 6 if Type B Spring Clip Fastening is omitted.

Model AG-35 Opposed Blade Damper

For Model CT diffusers 3" and wider. Not recommended for Models CT-480 and CT-481. Cannot be attached to Frame and Border Types 3 and 4. Use Model AG-35B damper for those types.

Note: Minimum duct width is 3"  
\*For floor models, dimension is 4"

Model BLKS Steel Blank-Off

For all widths of Model CT diffusers. Furnished in 6' lengths for field cutting and installation. Steel, painted flat black.

Model AD Access Door (Not available on Types 3, 4, 5, 6, and 22; and not available when damper is required)

Note:  
Maximum  
Length  
is 6 feet.

Performance notes appear at end of performance data

## PERFORMANCE DATA

## diffusers

- All pressures are in inches of water
- Throw velocities are given for terminal velocities of 150, 100 and 50 fpm. For an explanation of catalog throw data, see the Engineering Guidelines section.
- Throw values are based on an active section 4 feet long
- Multipliers for correcting the throw for other lengths are shown in the table below

### Throw Correction for Length (multiply)

| Active Length (ft) | 2    | 4 | 8   | 10  |
|--------------------|------|---|-----|-----|
| Throw Correction   | 0.72 | 1 | 1.5 | 1.7 |

Note: Throw values based on applications with surface effect. Use the multiplier of 0.7 for free jet applications

- NC values are based on a room absorption of 10 dB, re 10<sup>-12</sup> watts, with a 4-foot active diffuser section. Corrections for other lengths are shown in the table below.

### NC Correction for Length (add)

| Active Length (ft) | 2  | 4 | 6 | 8 | 10 |
|--------------------|----|---|---|---|----|
| NC Correction      | -3 | 0 | 2 | 3 | 5  |

- When the diffuser is used as a return intake, the NC value is increased by 4, and the negative static pressure is 0.8 times the listed total pressure
- Dash (–) in space denotes an NC value less than 10
- For continuous lengths, the selection for NC is usually based on a 10-foot section
- These products have been tested per ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet and supply plenums, may vary in the field. See the Engineering Guidelines section of this catalog for additional information.
- Maximum available width 24 inches except frames 5, 6 and 15 (12" width). Consult your Titus representative for performance data.
- For continuous lengths it is recommended that maximum active lengths are no longer than 10 feet

## Linear Louver Diffusers

diffusers

### LL-1 / LL-2

- Titus architectural linear louver diffusers combine crisply sculptured styling, careful workmanship, and effective air distribution
- Designed for both heating and cooling applications, supply as well as return
- Excellent performance in variable air volume systems. Ceiling mounted diffusers maintain a uniform, horizontal discharge pattern over widely varying flow rates.
- Available in both one-way and two-way discharge patterns
- Choice of four different frame types, all with removable cores
- Accessories such as directional blades, dampers, blank-offs, and mitered corners make these diffusers even more versatile
- Ideal for continuous length applications. Multiple sections are shipped with required alignment strips or pins for field installation.

LL-1

LL-2

metric sizes

MRI compatible

### AVAILABLE MODELS:

LL-1 / 1-Way Pattern / Fixed Louvers

LL-2 / 2-Way Pattern / Fixed Louvers

### FINISHES

Standard Finish - #26 White

Optional Finishes - #01 Aluminum, #04 Mill, #25 Off White, #84 Black

Anodized finishes available

### OVERVIEW

Architectural / Adjustable / Aluminum

Titus architectural linear louver diffusers combine crisply sculptured styling, careful workmanship, and effective air distribution. They offer excellent performance in variable air volume systems. Ceiling mounted diffusers maintain a uniform, horizontal discharge pattern over widely varying flow rates.

### ADDITIONAL FEATURES

- Maximum one piece section is 6 feet. Lengths greater than 6 feet are furnished in multiple sections.
- Material is extruded aluminum

See website for Specifications

### CHOICE OF FLOW PATTERN

LL-1 - One-Way Pattern

LL-2 - Two-Way Pattern

### AVAILABLE WIDTHS

LL-1 - One-Way Pattern

|                      |                                 |
|----------------------|---------------------------------|
| Nominal Duct Width   | 3½, 4¼, 5, 5¾, 6½, 8, 9½, 11¾   |
| Actual Duct Width D' | 3⅝, 4⅜, 5⅛, 5⅞, 6⅝, 8⅛, 9⅝, 11⅞ |
| Face Width C         | 3⅜, 4⅜, 4⅞, 5⅝, 6⅜, 7⅞, 9⅜, 11⅝ |

LL-2 - Two-Way Pattern

|                      |                      |
|----------------------|----------------------|
| Nominal Duct Width   | 6¼, 7¼, 9¼, 10¼, 12¼ |
| Actual Duct Width D' | 6⅜, 7⅞, 9⅜, 10⅞, 12⅞ |
| Face Width C         | 6⅞, 7⅝, 9⅞, 10⅝, 12⅝ |

### Frame Types 1A & 1B

- Surface Flange, Duct Mount

### Frame Type 2

- No Flange, Duct Mount

### END FABRICATION

Model 07 Directional Blades

Model 07 is integral part of diffuser.

Model AG-35

Opposed Blade Damper. AG-35 will not mount on Model 07 Directional Blades.

Model LL BLK - Blank-Off

For all widths of Model LL diffusers. Furnished in 6-foot lengths for field cutting and installation. Steel, painted flat black.

Side Wall

Ceiling

Note: Remove shipping clip before installation

## PERFORMANCE DATA

## diffusers

- All pressures are in inches of water
- Throw velocities are given for isothermal terminal velocities of 150, 100 and 50 fpm. For an explanation of data, see the Engineering Guidelines section.
- Throw values are based on an active section 4 feet long. Multipliers for correcting the throw for other lengths are shown in the following table
- NC values are based on a room absorption of 10 dB, re 10<sup>-12</sup> watts, with a 4-foot active diffuser section. Corrections for other lengths are shown in the table below.
- When the diffuser is used as a return intake, the NC value is increased by 4, and the negative static pressure is 0.8 times the listed total pressure
- Dash (-) in space denotes an NC value less than 10
- For continuous lengths, the selection for NC is usually based on a 10-foot section
- These products have been tested per ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the Engineering Guidelines section of this catalog for additional information.
- An asterisk (\*) indicates effective free area per linear foot

Throw Correction for Length (multiply)

| Active Length (ft) | 2    | 4 | 8   | 10  |
|--------------------|------|---|-----|-----|
| Throw Correction   | 0.72 | 1 | 1.5 | 1.7 |

NC Correction for Length (add)

| Active Length (ft) | 2  | 4 | 6 | 8 | 10 |
|--------------------|----|---|---|---|----|
| NC Correction      | -3 | 0 | 2 | 3 | 5  |

## Round Ceiling Diffusers

diffusers

### TMR / TMR-AA

- Models TMR and TMR-AA round ceiling diffusers are designed for cooling applications
- All sizes have three cones, giving a uniform appearance where different sizes are used in the same area
- Uniform 360° discharge pattern
- Excellent performance in variable air volume systems
- The two horizontal discharge settings allow the diffuser to be adjusted for two different flow rate conditions. At Position 1, maximum capacity is obtained. At Position 2, induction is increased.
- Adjustment achieved by removing the two inner cones as a unit and repositioning six screws
- Spring lock allows easy removal and replacement of the two inner cones

TMR / TMR-AA

open ceiling

### AVAILABLE MODELS:

TMR / Steel  
TMR-AA / Aluminum

### FINISHES

Standard Finish - #26 White  
Optional Finish - #01 Aluminum

### OVERVIEW

#### Two Horizontal Discharge Patterns

Models TMR and TMR-AA round ceiling diffusers are designed for both heating and cooling applications. All sizes have three cones, giving a uniform appearance where different sizes are used in the same area. They deliver a uniform 360° discharge pattern and exhibit excellent performance in variable air volume systems.

### ADDITIONAL FEATURES

- Retainer cable provided to allow the inner core assembly to hang during maintenance of diffusers with a neck size of 12 inches or greater
- Material is steel (TMR) or aluminum (TMR-AA) with steel screws

See website for Specifications

TMR diffusers installed in an open ceiling office environment

TMR / TMR-AA UNIT DIMENSIONS

Note: Position 1 is with cones down. Position 2 is with cones up.

| Nominal Round Duct Size D | B   | C   | E (Pos. 1) | E (Pos. 2) |

- All pressures given are in inches of water
- Throw values given are for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions
- To obtain static pressure, subtract the velocity pressure from the total pressure
- If the diffuser is mounted on an exposed duct, the throw values are 70% of those listed in the table and will project downward
- Each NC value represents the noise criteria curve which will not be exceeded by the sound pressure in any of the octave bands, 2 through 7, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- Dash (-) in space denotes an NC value of less than 10
- Diffusers are shipped in Position 2 (cones down)
- Data obtained from tests conducted in accordance with ANSI / ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the section, Engineering Guidelines, for additional information.
- For an explanation of catalog throw data, see the Engineering Guidelines section of this catalog

## TMRA / TMRA-AA

- Models TMRA and TMRA-AA adjustable round ceiling diffusers are designed for both heating and cooling applications
- All sizes have four cones, giving uniformity of appearance where different sizes are used in the same area
- Discharge pattern can be adjusted for horizontal flow by extending the cones or for vertical flow by retracting the cones
- Uniform 360° discharge pattern
- Excellent performance in variable air volume systems and open ceiling applications
- Type 1 with three fixed cone positions, is adjusted by removing the three inner cones as a unit and repositioning. Available in duct sizes 6" through 36" steel, 6" through 18" aluminum.
- Type 2 (steel only) is adjusted by sliding the three inner cones up or down. Available in duct sizes 6" through 12".
- Type 3 (steel only) is adjusted by rotating the center cone. Available in duct sizes 6" through 36".

open ceiling

### AVAILABLE MODELS:

TMRA / Steel

TMRA-AA / Aluminum

### FINISHES

Standard Finish - #26 White

Optional Finish - #01 Aluminum

### OVERVIEW

Vertical to Horizontal Discharge Patterns / Adjustable

The TMRA is an adjustable round ceiling diffuser designed for both heating and cooling applications. All sizes have four cones, giving uniformity of appearance where different sizes are used in the same area. It delivers a uniform 360° discharge pattern and exhibits excellent performance in variable air volume systems.

### ADDITIONAL FEATURES

- Optional Type B outer cone reduces ceiling smudging. Also useful where the plenum height or the space for the ceiling openings is limited. Available for diffusers with duct sizes 6" through 24" for steel diffusers, 6" through 18" for aluminum diffusers.
- Spring lock allows easy removal and replacement of the three inner cones

See website for Specifications

- Retainer cable provided to allow the inner core assembly to hang during maintenance of diffusers with a neck size of 12 inches or greater
- Material is steel or aluminum with steel components

Note 1: An asterisk (\*) indicates the adjusting shaft will project above the diffuser neck on sizes 14 through 36 of TMRA models with Type 3 Rotating Adjustment. The maximum projection is the same as Dimension P. Neck-mounted dampers are not compatible when in a heating configuration.

Note 2: Sizes 20 through 36 are available in steel only

Note: The three neck velocity values used are for 6-, 12- and 24" diffusers respectively

- All pressures are given in inches of water
- Throw values are given for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions
- To obtain static pressure, subtract the velocity pressure from the total pressure
- If the diffuser is mounted on an exposed duct, the throw values are 70 percent of those listed in the table
- Each NC value represents the noise criteria curve that will not be exceeded by the sound pressure in any of the octave bands, 2nd through 7th, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- Dash (-) in space denotes an NC value of less than 10
- Add 1 NC for vertical setting
- Downward projection of heated air values represent the distance to a total air velocity of essentially zero
- Data obtained from tests conducted in accordance with ANSI / ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the section Engineering Guidelines of this catalog for additional information.
- For an explanation of catalog throw data, see the section, Engineering Guidelines

Round Ceiling Diffusers (continued)

## XC-310

- Model XC-310 heavy duty round ceiling diffusers are designed for both heating and cooling applications
- Uniform 360° discharge pattern
- Excellent performance in variable air volume applications
- Discharge pattern can be adjusted from full horizontal to full vertical. At the full vertical setting the diffuser forces the air in a long downward projection. The result is effective heating and spot cooling from high mounting locations.
- Especially suitable for factories, warehouses, convention halls, coliseums, shopping malls, and other applications where ceilings are high and conditions are variable

XC-310

factories

open ceiling

### AVAILABLE MODEL:

XC-310 / Steel / Ring Operated / Vertical to Horizontal Discharge Pattern

### FINISH

Standard Finish - #26 White

### OVERVIEW

Adjustable Heavy Duty / Steel

Titus model XC-310 heavy duty round ceiling diffusers are especially suitable for factories, warehouses, convention halls, coliseums, shopping malls, and other applications where ceilings are high and conditions are variable.

### ADDITIONAL FEATURES

- Ring operator can be adjusted with a pole
- Outer cone is contoured to guard against ceiling smudging
- Optional damper is adjustable by removing the inner core of the diffuser
- Material is steel

See website for Specifications

- All pressures are in inches of water
- Radius of diffusion values are given for a terminal velocity of 50 fpm with a 20°F cooling temperature differential
- Vertical projection values are given for a terminal velocity of 50 fpm. Minimum projections are for a 40°F heating temperature differential, while maximum projections are for a 20°F cooling differential.
- NC values are based on a room absorption of 10 dB, re 10<sup>-12</sup> watts. Values shown are for the horizontal discharge pattern (center closed). For the vertical pattern (center open), subtract three.
- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the Engineering Guidelines section of this catalog for additional information.

## V-1

- Model V-1 round ceiling diffusers are designed for both heating and cooling applications
- Vortex generators spin the air in a spiral pattern. This creates a Coanda effect, forcing the air to adhere to the curved border and spread evenly across the ceiling.
- Uniform 360° discharge pattern
- Excellent performance in variable air volume applications
- Especially suitable for foyers, waiting rooms and other areas with recessed lighting fixtures. Complements black light and down light fixtures.
- Adjusted from horizontal to vertical discharge vortex by opening the blank-off plate in the center

V-1

recessed lighting

### AVAILABLE MODEL:

V-1 / Vortex Diffuser

### FINISH

Standard Finish - #84 Black

### OVERVIEW

Adjustable Vortex / Steel

Vortex generators spin the air in a spiral pattern. This creates a Coanda effect, forcing the air to adhere to the curved border and spread evenly across the ceiling. These diffusers are especially suitable for foyers, waiting rooms and other areas with recessed lighting fixtures.

### ADDITIONAL FEATURES

- Optional damper is adjusted through the diffuser face. Access for adjustment is gained by opening the blank-off plate.
- Material is steel

See website for Specifications

- All pressures are in inches of water
- Radius of diffusion values (feet) are given for terminal velocities of 150, 100 and 50 fpm
- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the Engineering Guidelines section of this catalog for additional information.
- NC (noise criteria) values are based on a room absorption of 10 dB, re 10<sup>-12</sup> watts

## Perforated Ceiling Diffusers

### PAS / PAR / PDS / PDR

- Titus perforated ceiling diffusers are designed for both heating and cooling applications
- Excellent performance in variable air volume systems
- A tight, uniform, horizontal blanket of air protects the ceiling against smudging
- Return models have the same face and border construction as the supply models, for harmonious appearance in the room
- Discharge pattern (supply models) can be adjusted to vertical as well as to 1-, 2-, 3- or 4-way horizontal. Can be adjusted before or after installation.
- Discharge pattern is easily adjusted by unlatching and dropping the perforated face, then rotating the pattern controllers
- Dropping the perforated face also gives access to the optional damper

#### AVAILABLE MODELS:

##### Steel Models:

PAS / Supply / Flush Face  
PAR / Return / Flush Face  
PDS / Supply / Drop Face  
PDR / Return / Drop Face

##### Aluminum Models:

PAS-AA / Supply / Flush Face  
PAR-AA / Return / Flush Face

#### FINISH

Standard Finish - #26 White

#### OVERVIEW

1-, 2-, 3-, or 4-Way Discharge Pattern

Perforated ceiling diffusers are typically selected to meet architectural demands for air outlets that blend into the ceiling plane. Titus perforated diffusers can be selected for a round pattern to maximize capacity or star pattern to maximize throw.

#### ADDITIONAL FEATURES

- Perforated face has  $\frac{3}{16}$ " diameter holes on  $\frac{1}{4}$ " staggered centers
- Inlet collar (neck) has ample depth for easy duct connection
- Material is heavy gauge steel backpan; steel or aluminum perforated face according to the model selected
- Optional factory-installed R-6 foil-backed insulation available for 24 x 24" full face models, neck sizes 6-16, borders 1, 2, 3 and 4

See website for Specifications

Performance notes appear at end of performance data

## PERFORMANCE DATA

## diffusers

- Data obtained from tests conducted in accordance with ANSI / ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the Engineering Guidelines section of this catalog for additional information.
- Throw values given are for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions
- For an explanation of catalog throw data, see the section, Engineering Guidelines
- NC values based on octave band 2 to 7 sound power levels minus a room absorption of 10 dB
- Each NC value represents the noise criteria curve that will not be exceeded by the sound pressure in any of the octave bands, 2 through 7, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- Dash (-) in space denotes an NC value of less than 10
- All pressures are given in inches of water
- To obtain static pressure, subtract the velocity pressure from the total pressure

### PAR, PXP, PMR, PXP-DR, PDR PERFORMANCE NOTES

- Supply unit with deflectors removed
- Static pressures are negative, in inches of water, measured per ANSI/ASHRAE Standard 70-2006
- Noise Criteria (NC) based on a room absorption of 10 dB, re 10<sup>-12</sup> watts, measured per ANSI/ASHRAE Standard 70-2006
- These products have been tested per ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field.
- See the section, Engineering Guidelines for additional information

Perforated Ceiling Diffusers (continued)

PXP / PXP-DF / PXP-AA

- Model PXP Series perforated panels are designed for return or exhaust applications
- Panels match Models PAS, PDS, and PAS-AA supply diffusers in appearance after installation
- Installed by laying between T-bars
- Perforated panel has  $\frac{3}{16}$ " diameter holes on  $\frac{1}{4}$ " staggered centers
- Material is heavy gauge steel or aluminum
- MRI compatible (PXP-AA)

PXP / PXP-DF / PXP-AA

MRI compatible

FINISH

Standard Finish - #26 White

OVERVIEW

Return Panels

Model PXP Series perforated panels are designed for return or exhaust applications. Panels match Models PAS, PDS, and PAS-AA supply diffusers in appearance after installation.

For Performance Data and notes, please refer to the PAR, PXP, PMR, PXP-DR, PDR table on page F89.

See website for Specifications

PXP / PXP-DF / PXP-AA UNIT DIMENSIONS

Model PXP and PXP-AA  
(Lay-In)

Ceiling Module Sizes Available: 12 x 12, 16 x 16, 20 x 20, 24 x 12, 24 x 24, 48 x 24

Model PXP-DF (Lay-In or Tegular)  
(Lay-In shown)

Ceiling Module Sizes Available: 12 x 12, 16 x 16, 20 x 20, 24 x 12, 24 x 24, 48 x 24

## PSS / PSS-DF / PSS-AA

- Titus Series PSS perforated star diffusers generate a high induction air pattern that maximizes throw
- PSS diffusers deliver a horizontal blanket of air that adheres to the ceiling even at varying volumes. An excellent choice for VAV systems.
- Deflector is mounted directly under the neck of the diffuser to generate the long-throw star pattern
- Pressure drop and noise levels are lower than typical curved blade perforated diffusers
- Vertical air pattern can be obtained by turning all deflector blades inward
- Three-way pattern or corner blow can be field adjusted with no increase in pressure drop or sound level
- Available with either side blow or corner blow. Side blow maximizes throw. Corner blow maximizes wall surface coverage in a perimeter installation.

PSS / PSS-DF / PSS-AA

### AVAILABLE MODELS:

Steel Models:  
PSS / Flush Face  
PSS-DF / Drop Face

Aluminum Model:  
PSS-AA / Flush Face

### FINISH

Standard Finish - #26 White

### OVERVIEW

Star Pattern / Adjustable

Titus Series PSS perforated star diffusers generate a high induction air pattern that maximizes throw. The deflector is mounted directly under the neck of the diffuser to generate the long-throw star pattern. As a result, pressure drop and noise levels are lower than typical curved blade perforated diffusers.

### ADDITIONAL FEATURES

- Can be changed to either side blow or corner blow in the field
- Round neck with deep collar for easy connection to flexible duct
- Perforated face is hinged to allow access to the star deflector. The optional damper is adjustable after removal of the star deflector.
- Perforated face has  $\frac{3}{16}$ " holes on  $\frac{1}{4}$ " staggered centers
- Material is heavy gauge steel backpan with steel or aluminum perforated face, according to the model selected
- Optional factory-installed R-6 foil-backed insulation available for 24 x 24" full face models, neck sizes 6-16, borders 1, 2, 3 and 4

See website for Specifications

### FIELD ADJUSTMENTS

Pattern can be changed from side blow to corner blow and vice versa by removing four screws, rotating deflector 45 degrees, and replacing screws.

Section A-A  
Back Blades Front Blades  
Back blades can be redirected to produce directional adjustment pattern as shown above.

## DIMENSIONS

## diffusers

### BORDER TYPES

In addition to Border Type 3 (lay-in), as dimensioned on the preceding page, Series PSS diffusers are also available in border types to fit the various ceiling systems shown here.

- All of these border types can be furnished with both the 12 x 12" and 24 x 24" face or ceiling module size
- The table below indicates the round and square neck sizes that can be selected

### AVAILABLE SIZES

| Nominal Duct Size D | Face or Ceiling Module Size |         |
|---------------------|-----------------------------|---------|
|                     | 12 x 12                     | 24 x 24 |
| 6x6                 | •                           | •       |

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the Engineering Guidelines section of this catalog for additional information.
- Throw values given are for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions
- For an explanation of catalog throw data, see the Engineering Guidelines section of this catalog
- NC values based on octave band 2 to 7 sound power levels minus a room absorption of 10 dB
- Each NC value represents the noise criteria curve that will not be exceeded by the sound pressure in any of the octave bands, 2 through 7, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- Dash (-) in space denotes an NC value of less than 10
- All pressures are given in inches of water
- To obtain static pressure, subtract the velocity pressure from the total pressure

## PCS / PCS-DF / PCS-AA

- Titus Series PCS ceiling diffusers are designed for longer throws
- Good performance in variable air volume systems
- Discharge pattern can be adjusted from horizontal to vertical. Can be adjusted before or after installation.
- Discharge pattern is adjusted by dropping the hinged, perforated face and moving the curved deflector blades (see the Removing Perforated Face and Adjusting Pattern Controllers diagram within this section)
- Dropping the perforated face also gives access for adjusting the optional damper
- Perforated face has  $\frac{3}{16}$ " diameter holes on  $\frac{1}{4}$ " staggered centers
- Round inlet collar is approximately 1½" deep for easy duct connection
- Material is heavy gauge steel backpan with steel or aluminum perforated face, according to the model selected

PCS / PCS-DF / PCS-AA

### AVAILABLE MODELS:

Steel Models:  
PCS / Flush Face  
PCS-DF / Drop Face

Aluminum Model:  
PCS-AA / Flush Face

### FINISH

Standard Finish - #26 White

### OVERVIEW

Curved Blade – 1-, 2-, 3-, or 4-Way Deflectors

Titus Series PCS ceiling diffusers are designed for longer throws. Discharge patterns can be adjusted from either horizontal to vertical before or after installation.

Note 1: Module Size 16 x 16 and 20 x 20 are only available with Border Type 3

Note 2: Shaded neck sizes indicate the die-stamped backpan shown above is used. The square backpan is used for all other neck sizes.

## DIMENSIONS

## diffusers

### BORDER TYPES

In addition to Border Type 3 (lay-in), as dimensioned on the preceding page, Series PCS diffusers are also available in border types to fit the various ceiling systems shown here

- All of these border types can be furnished with both the 12 x 12" and 24 x 24" face or ceiling module size
- The following tables indicate the round and square neck sizes that can be selected

- Indicates available size. Not all sizes available in all border types
- Indicates aluminum (AA) available
- /□ Shaded area indicates stamped, formed backpan size

All dimensions are in inches

## REMOVING PERFORATED FACE

## ADJUSTING PATTERN CONTROLLERS

Round Neck - 4-Way

Square Neck - 4-Way

The pattern deflector in the neck of the diffuser consists of individually adjustable blades. These blades vary the discharge pattern from full horizontal to vertical and also damper the air volume.

The standard model PCS diffuser has a 4-way discharge pattern. Also available are the patterns below.

1-Way

2-Way  
Opposite

2-Way  
Corner

3-Way

PCS / ROUND / CURVED BLADE / ADJUSTABLE - 1-, 2-, 3- OR 4-WAY DEFLECTORS

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the Engineering Guidelines section of this catalog for additional information.
- Throw values given are for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions
- For an explanation of catalog throw data, see the Engineering Guidelines section of this catalog
- NC values based on octave band 2 to 7 sound power levels minus a room absorption of 10 dB

- Each NC value represents the noise criteria curve that will not be exceeded by the sound pressure in any of the octave bands, 2 through 7, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- Dash (-) in space denotes an NC value of less than 10
- All pressures are given in inches of water
- To obtain static pressure, subtract the velocity pressure from the total pressure

PCS / SQUARE / CURVED BLADE / ADJUSTABLE - 1-, 2-, 3- OR 4-WAY DEFLECTORS

## Narrow Tee

- Titus has a complete line of perforated diffusers that are designed to integrate into narrow tee ceiling systems
- Perforated face blends diffuser into ceiling system

NARROW TEE

### AVAILABLE MODELS:

Supply Models:  
 PAS-NT / Round Pattern  
 PSS-NT / Star Pattern  
 PCS-NT / Curved Blade

Return Models:  
 PAR-NT / Return  
 PXP-NT / Return Panel

### FINISH

Standard Finish - #26 White

### OVERVIEW

Narrow Tee / Steel

Perforated ceiling diffusers are typically selected to meet architectural demands for air outlets that blend into the ceiling plane. Titus perforated diffusers can be selected for a round pattern to maximize capacity or star pattern to maximize throw.

For Performance Data and Notes, please refer to page F86 for PAS-NT; page F92 for PAR-NT and PXP-NT; page F100 for PSS-NT; page F105 for PCS-NT.

See website for Specifications

## PMC / PMC-DF / PMR

- Titus Model PMC perforated, modular core diffuser is extremely flexible; it can be adjusted for a 1-, 2-, 3- or 4-way discharge pattern after it has been installed
- Perforated face provides the architectural advantage of blending the diffuser into the ceiling system and at the same time offering the performance of the modular core diffuser for variable air volume applications. (Maintains a horizontal flow pattern from maximum to minimum cfm in VAV systems)
- Perforated face discourages unwanted tampering with the air pattern adjustment by providing a barrier in front of the modular core
- Perforated face has  $\frac{3}{16}$ " diameter holes on  $\frac{1}{4}$ " staggered centers
- Each of the modular core sections can easily be removed from the frame and rotated to provide 1-, 2-, 3-way or a vertical air pattern
- Shipped with the modular core set for a 4-way discharge

PMC / PMC-DF / PMR

### AVAILABLE MODELS:

Supply Models:  
PMC / Flush Face  
PMC-DF / Drop Face

Return Model:  
PMR / Flush Face

### FINISH

Standard Finish - #26 White

### OVERVIEW

Modular Core – 1-, 2-, 3-, or 4-Way Adjustable / Steel

PMC perforated, modular core diffuser can be adjusted for a 1, 2, 3 or 4-way discharge pattern after installation. The perforated face provides an architectural advantage of blending the diffuser into the ceiling system and at the same time offering the performance of the modular core diffuser.

### ADDITIONAL FEATURES

- Optional AG-95 damper is accessible for adjustment by opening the perforated face and removing a core module
- Material is heavy gauge steel perforated face and backpan; modular core section is steel
- New core design results in a higher quality overall assembly, and easier changes to modular core placement

See website for Specifications

## DIMENSIONS

### PMC / PMC-DF / PMR UNIT DIMENSIONS

Model PMC  
Border Type 3 (Lay-In)

Model PMC-DF  
Border Type 3  
(Lay-In or Tegular)  
(Lay-In shown)

Model PMR  
Border Type 1C  
(Curved Frame,  
Surface Mount)

Note: For PMR Border Types 1 and 3 select the PAR return

All dimensions are in inches

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the Engineering Guidelines section of this catalog for additional information.
- Throw values are given for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions. See the section, Engineering Guidelines, for an explanation of catalog throw data.
- NC values based on octave band 2 to 7 sound power levels minus a room absorption of 10 dB
- Each NC value represents the noise criteria curve that will not be exceeded by the sound pressure in any of the octave bands, 2nd through 7th, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- Dash (-) in space denotes an NC value of less than 10
- All pressures are given in inches of water
- To obtain static pressure, subtract the velocity pressure from the total pressure

## Square Ceiling Diffusers

diffusers

### TMS / TMS-AA

- Titus Models TMS and TMS-AA square ceiling diffusers deliver supply air in a true 360° pattern. Designed to protect ceilings from streaking and smudging.
- Excellent performance in variable air volume systems. The uniform, nearly horizontal jet from the outer cone maintains effective room air distribution even when the air volume varies over a considerable range.
- All sizes have three cones, giving a uniform appearance where different neck sizes are used in the same area
- Screwdriver adjustment of the optional damper is achieved without removing the inner cone. (See Step 2 in Adjusting Optional Damper, Removing Center Core diagram on page 111)
- Quick removal of the inner cone with a hex key. (See Step 3 in Adjusting Optional Damper, Removing Center Core diagram on page 111)
- All cones are die-stamped, one piece construction. Smooth, clean surfaces with no corner joints.

TMS-AA / Aluminum

### FINISH

Standard Finish - #26 White

### OVERVIEW

#### High Performance

The TMS is a square ceiling diffuser that delivers supply air in a true 360° pattern with low pressure drop. The uniform, nearly horizontal jet from the outer cone maintains effective room air distribution even when the air volume varies over a considerable range. All sizes have three cones, giving a uniform appearance where different neck sizes are used in the same area.

### ADDITIONAL FEATURES

- Optional factory-installed R-6 foil-backed insulation available for 24 x 24" full face models, neck sizes 6-15, borders 1, 2, 3 and 4
- Optional (SB) sectorizing baffle is available. Consult your Titus representative for details.
- Material: all sizes are available in steel (Model TMS). Only the 24 x 24" ceiling module is available in aluminum with steel bar (Model TMS-AA).

See website for Specifications

Notes:

1. Aluminum construction is available in full face 24" x 24" ceiling module only. Steel construction is available in all sizes.
2. Adapter is provided for sizes 4 and 5
3. The smallest neck size available in aluminum is 6 inches

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the Engineering Guidelines section of this catalog for additional information.
- If the diffuser is mounted on an exposed duct, the throw values are 70% of those listed in the table
- Throw values given are for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions. See the section, Engineering Guidelines, for an explanation of catalog throw data.
- NC values based on octave band 2 to 7 sound power levels minus a room absorption of 10 dB
- Each NC value represents the noise criteria curve which will not be exceeded by the sound pressure in any of the octave bands, 2nd through 7th, with a room absorption of 10 dB, re 10-12 watts
- Dash (-) in space denotes an NC value of less than 10
- All pressures are given in inches of water
- To obtain static pressure, subtract the velocity pressure from the total pressure

## TMSA / TMSA-AA

- Titus Models TMSA and TMSA-AA diffusers include adjustable vanes which vary the discharge pattern between vertical and horizontal
- All sizes have three cones, giving a uniform appearance where different neck sizes are used in the same area
- Screwdriver adjustment of the optional damper is achieved without removing the inner cone. (See Step 2 in Adjusting Optional Damper, Removing Center Cone diagram in this section)
- Quick removal of the inner cone with a hex key. (See Step 3 in Adjusting Optional Damper, Removing Center Cone diagram in this section)
- All cones are die-stamped, one piece construction. Smooth, clean surfaces.
- Optional (SB) sectorizing baffle is available. Consult your Titus representative for details.

### AVAILABLE MODELS:

TMSA / Steel  
TMSA-AA / Aluminum

### FINISH

Standard Finish - #26 White

### OVERVIEW

High Performance / Horizontal to Vertical  
Discharge Pattern / Adjustable

Titus Models TMSA and TMSA-AA diffusers feature adjustable vanes which vary the discharge pattern between vertical and horizontal for heating and cooling applications. These diffusers deliver supply air in 360° pattern and are designed to protect ceilings from smudging. All sizes have 3 cones providing a uniform appearance.

### ADDITIONAL FEATURES

- Material: all sizes are available in steel (Model TMSA). Only the 24 x 24" ceiling module is available in aluminum with steel support bar (Model TMSA-AA).
- Delivers supply air in 360° pattern. Designed to help protect ceilings from streaking and smudging.

See website for Specifications

## Notes:

1. Aluminum construction is available in full face 24" x 24" ceiling module only. Steel construction is available in all sizes.
2. Adapter is provided for sizes 4 and 5
3. The smallest neck size available in aluminum is 6 inches

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the Engineering Guidelines section of this catalog for additional information.
- If the diffuser is mounted on an exposed duct, the throw values are 70% of those listed in the table
- Throw values given are for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions. See the section, Engineering Guidelines for the catalog throw data information.
- NC values are based on octave band 2 to 7 sound power levels minus a room absorption of 10 dB

- Each NC value represents the noise criteria curve that will not be exceeded by the sound pressure in any of the octave bands, 2 through 7, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- Dash (-) in space denotes an NC value of less than 10
- All pressures are given in inches of water
- To obtain static pressure, subtract the velocity pressure from the total pressure
- Horizontal throw is along a surface
- Vertical throw is a free jet

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the Engineering Guidelines section of this catalog for additional information.
- If the diffuser is mounted on an exposed duct, the throw values are 70% of those listed in the table
- Throw values given are for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions. See the section, Engineering Guidelines for the catalog throw data information.
- NC values based on octave band 2 to 7 sound power levels minus a room absorption of 10 dB
- Dash (-) in space denotes an NC value of less than 10
- All pressures are given in inches of water
- Each NC value represents the noise criteria curve that will not be exceeded by the sound pressure in any of the octave bands, 2 through 7, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- To obtain static pressure, subtract the velocity pressure from the total pressure
- Horizontal throw is along a surface
- Vertical throw is a free jet

## MCD / MCD-AA

- Titus Model MCD modular core diffuser is extremely flexible; it can be adjusted for a 1-, 2-, 3-, or 4-way pattern after it has been installed
- Maintains a horizontal flow pattern from maximum to minimum cfm, making the MCD an excellent choice for variable air volume systems
- Optional AG-95 opposed blade damper is accessible for adjustment from the diffuser face by removing a core module
- MCD is shipped with the modular core set for 4-way discharge
- Material is heavy gauge steel (MCD) or aluminum with miscellaneous steel parts (MCD-AA)
- New core design results in a higher quality overall assembly, and easier changes to modular core placement
- Now available with round neck for flex duct applications

MCD / MCD-AA

### AVAILABLE MODELS:

MCD / Steel  
MCD-AA / Aluminum

### FINISH

Standard Finish - #26 White

### OVERVIEW

Modular Core - 1-, 2-, 3-, or 4-Way Adjustable

Titus Model MCD modular core diffuser is extremely flexible; it can be adjusted for a 1, 2, 3, or 4-way pattern after it has been installed. The MCD maintains a horizontal flow pattern from maximum to minimum cfm, making it an excellent choice for variable air volume systems.

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the section, Engineering Guidelines of this catalog for additional information.
- Dash (-) in space denotes an NC value of less than 10
- Throw values given are for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions. See the section, Engineering Guidelines for the catalog throw data information.
- NC values based on octave band 2 to 7 sound power levels minus a room absorption of 10 dB
- Each NC value represents the noise criteria curve that will not be exceeded by the sound pressure in any of the octave bands, 2 through 7, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- All pressures are given in inches of water
- To obtain static pressure, subtract the velocity pressure from the total pressure

## Architectural Ceiling Diffusers

diffusers

### OMNI / OMNI-AA

- The Titus OMNI diffuser satisfies architectural as well as engineering criteria. Its strong, clean, unobtrusive lines harmonize with the ceiling system, without sacrificing performance.
- The curvature of the OMNI backpan works with the formed edges of the face panel to deliver a uniform 360° horizontal air pattern, without excessive noise or pressure drop
- The OMNI diffuser is an excellent choice for variable air volume systems. The air pattern remains tight and horizontal for effective room air distribution, even when the volume varies over a wide range.
- The face panel is constructed from 22-gauge steel or heavy gauge aluminum. The edges of the face panel are formed to a radius for a solid, crisp appearance. The formed edges also stiffen the face panel and assure a straight and level surface.

OMNI-AA / Aluminum

### FINISHES

Standard Finish - #26 White  
Optional Finish - Woodgrains (See Woodgrains Brochure for Finishes)

### OVERVIEW

Square Plaque

The Titus OMNI (steel plaque) & OMNI-AA (all-aluminum plaque) face diffusers that satisfy architectural and engineering criteria. Their strong, clean, unobtrusive lines harmonize with ceiling systems without sacrificing performance. The curvature of the OMNI & OMNI-AA backpans work with the formed edges of the face panel to deliver a uniform 360 degree horizontal air pattern, without excessive noise or pressure drop. They are an excellent selection for variable air volume systems.

### ADDITIONAL FEATURES

- The formed edges of the face panel capture another 22-gauge steel or heavy gauge aluminum panel that the hanger brackets are mechanically fastened to. This process provides the OMNI face with a smooth finish under any lighting conditions.
- The OMNI-AA is entirely constructed of aluminum, perfect for MRI applications

OMNI diffusers installed in the ceiling of a country club

- The face panel is held in place by four hook brackets that positively engage into slots in the backpan. The panel can be removed from the backpan for easy installation of the diffuser or for access to the optional damper.
- The new face panel construction ensures a smooth, clean appearance and easier installation and removal
- Optional factory-insulated R-6 foil-backed insulation available for 24 x 24" full face models, neck sizes 6-15, borders 1, 2, 3 and 4

Note 1: Adapter is provided for sizes 4 and 5

Note 2: 12 x 12" module is available in steel only

## DIMENSIONS

## diffusers

### ADDITIONAL FRAME TYPES

Note: If Border 4V is adjacent to a light fixture a gap will be visible above the backpan. A T-bar extender is available to fill this void, available from the ceiling manufacturer.

Borders 4V and 4T have four mounting clips. Two clips on opposed sides with holes to attach mounting wire from above.

### OPTIONAL DIRECTIONAL BLOW CLIPS

Available Model:  
DB

- Converts OMNI diffuser from standard 4-way blow to 1-, 2- or 3-way
- Clips attach to hanger brackets on upper face of center panel

### OPTIONAL MOLDED INSULATION BLANKET

Insulation is R-6 where blanket has the most depth. One inch clearance on each side of neck is left for insulated duct connection. 24 x 24" full face models only.

### REMOVING AND REPLACING FACE PANEL - ADJUSTING OPTIONAL DAMPER

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the Engineering Guidelines section of this catalog for additional information.
- If the diffuser is mounted on an exposed duct, the throw values are 70% of those listed in the table
- Throw values are given for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions. See the section, Engineering Guidelines for catalog throw data information.
- NC values based on octave band 2 to 7 sound power levels minus a room absorption of 10 dB
- Dash (-) in space denotes an NC value of less than 10
- Each NC value represents the noise criteria curve which will not be exceeded by the sound pressure in any of the octave bands, 2 through 7, with a room absorption of 10 dB, re  $10^{-12}$  watts.
- All pressures are given in inches of water
- To obtain static pressure, subtract the velocity pressure from the total pressure

## OMNI-NT / OMNI-AA-NT

- The OMNI-NT and OMNI-AA-NT are designed to integrate into 24 x 24 Narrow Tee regressed ceiling systems
- The OMNI-NT and OMNI-AA-NT has strong, clean lines that harmonize with the ceiling system, yet performance is not sacrificed
- The curvature of the OMNI-NT and OMNI-AA-NT backpan works with the aerodynamically formed edge of the face panel to provide a tight 360° pattern
- Meets architectural and engineering criteria
- The edges of the face panel are formed to a radius for a solid, crisp appearance. The formed edges also stiffen the face panel and assure a straight and level surface.

OMNI-AA / OMNI-AA-NT

metric sizes

woodgrains

MRI compatible

See website for Specifications

### AVAILABLE MODELS:

OMNI-NT / Steel  
 OMNI-AA-NT / Aluminum

### FINISHES

Standard Finish - #26 White  
 Optional Finish - Woodgrains (See Woodgrains Brochure for Finishes)

### OVERVIEW

#### Square Plaque Narrow Tee

The Titus OMNI-NT (steel plaque) & OMNI-AA-NT (all-aluminum plaque) face diffusers for narrow tee installations that satisfy architectural and engineering criteria. Their strong, clean, unobtrusive lines harmonize with ceiling systems without sacrificing performance. The curvature of the OMNI-NT & OMNI-AA-NT backpans work with the formed edges of the face panel to deliver a uniform 360 degree horizontal air pattern, without excessive noise or pressure drop. They are an excellent selection for variable air volume systems.

### ADDITIONAL FEATURES

- The OMNI-AA-NT has optional Directional Blow Chips (DB) which allow the air pattern to be changed to three, two or one blow direction
- The OMNI-AA-NT is entirely constructed of aluminum, perfect for MRI applications
- The panel can be removed from the backpan for easy installation of the diffuser or for access to the optional damper
- The new face panel construction ensures a smooth, clean appearance and easier installation and removal

## DIMENSIONS

### OMNI-NT / OMNI-AA-NT UNIT DIMENSIONS

| Ceiling Module A | Nominal Round Duct Size B | C     | D     |
|------------------|---------------------------|-------|-------|
| 24 x 24          | 6, 8                      | 1 1/4 | 3 3/4 |

## R-OMNI

- The Titus R-OMNI - a great look in circular diffusers designed for architectural ceilings and facilities with exposed ductwork
- R-OMNI's completely smooth face is adjustable in three positions for horizontal or vertical flow. Can be used effectively in heating or cooling applications.
- Uniform 360° discharge pattern
- Excellent performance in variable air volume systems
- Optional Type B outer cone for reducing ceiling smudging
- Spring lock allows easy removal and replacement of the plaque assembly
- Material is heavy gauge steel

### AVAILABLE MODEL:

R-OMNI / Steel

### FINISH

Standard Finish - #26 White

### OVERVIEW

Round Plaque / Steel

The appearance of the R-OMNI diffuser is designed for architectural ceilings and facilities with exposed ductwork. The smooth face is adjustable in three positions for horizontal or vertical flow. The R-OMNI can be used effectively in heating or cooling applications and is an excellent choice in Variable Air Volume Systems.

See website for Specifications

R-OMNI installed in ceiling of a museum

Performance notes appear at end of performance data

## PERFORMANCE DATA

## diffusers

- All data, except vertical projection, was obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006
- Vertical projection data was calculated from computational fluid dynamics models
- All data based upon supply performance
- All pressures are in inches of water
- Diffusers are shipped in center position
- To obtain static pressure, subtract the velocity pressure from the total pressure
- The negative static pressure for return performance is equal to the total pressure of supply at the same cfm
- Return NC is 2 NC higher than supply NC at the same cfm
- Horizontal throw values are for terminal velocities of 150, 100 and 50 fpm under isothermal conditions
- If mounted on an exposed duct, the throw values are 70% of those listed in the table
- Vertical projections are for terminal velocity of 50 fpm in heating mode
- NC values based on a room absorption of 10 dB
- Dash (-) in space indicates NC value less than 10

## OMNI-RS

- The OMNI-RS diffuser is designed for an architectural look and engineered performance. Its clean, unobtrusive lines harmonize with ceiling systems without sacrificing performance.
- The unique round plaque face/square panel combination delivers a 360° tight horizontal air pattern without excessive noise or pressure drop
- The OMNI-RS provides excellent performance in variable air volume systems
- The OMNI-RS is constructed of heavy gauge steel

### AVAILABLE MODEL:

OMNI-RS / Steel

### FINISH

Standard Finish - #26 White

### OVERVIEW

Square Backpan / Round Plaque / Steel

The OMNI-RS diffuser is designed for an architectural look and engineered performance. The unique round plaque face/square panel combination delivers a 360° tight horizontal air pattern without excessive noise or pressure drop. It provides excellent performance in variable air volume systems.

See website for Specifications

## DIMENSIONS

### OMNI-RS UNIT DIMENSIONS

#### Border Type 3 (Lay-in)

#### Border Type 1 (Surface Mount)

Note: Diffuser will be shipped with Border 3. A TRM frame will be provided for surface mounting.

| Module Size | Nominal Duct Size | D      |
|-------------|-------------------|--------|
| 24 x 24     | 6                 | 5 7/8  |
|             | 8                 | 7 7/8  |
|             | 10                | 9 7/8  |
|             | 12                | 11 1/2 |

All dimensions are in inches

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the section, Engineering Guidelines of this catalog for additional information.
- Throw values given are for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions. See the section, Engineering Guidelines for the catalog throw data information.
- Each NC value represents the noise criteria curve that will not be exceeded by the sound pressure in any of the octave bands, 2 through 7, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- Dash (-) in space denotes an NC value of less than 10
- All pressures are given in inches of water
- To obtain static pressure, subtract the velocity pressure from the total pressure

## DAT

- The Titus DAT ceiling diffuser satisfies architectural as well as engineering criteria. Its smooth plaque face allows the diffuser to harmonize with the ceiling system, without sacrificing performance.
- The deep backpan of the DAT was designed to ensure optimum performance without excessive noise or pressure drop
- The DAT diffuser is an excellent choice for variable air volume systems. The air pattern remains tight and horizontal for effective room air distribution, even when the volume varies over a wide range.
- Fits 24 x 24" ceiling grids
- Choice of one, two or three slots. Slot width is 1½".
- Diffuser has a round neck with a deep collar for easy connection to flexible duct
- Core is easily removable from face of the diffuser
- Material is heavy gauge steel

DAT

### AVAILABLE MODEL:

DAT / Supply

### FINISH

Standard Finish - #26 White

### OVERVIEW

Louvered Plaque / Steel

The DAT ceiling diffuser satisfies architectural as well as engineering criteria. Its smooth plaque face allows the diffuser to harmonize with the ceiling system, without sacrificing performance. The deep backpan is designed for optimum performance without excessive noise or pressure drop, and is great for variable air volume applications.

[See website for Specifications](#)

### DAT UNIT DIMENSIONS

Border Type 3 (Lay-in)

| Ceiling Module | Number of Slots | Nominal Round Duct Size B | Plaque Face C |
|----------------|-----------------|---------------------------|---------------|
| 24 x 24        | 1               | 6, 8, 10                  | 19            |
|                | 2               | 6, 8, 10, 12              | 16            |
|                | 3               | 8, 10, 12, 14             | 13            |

- Throw values given are for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions. See the section, Engineering Guidelines for throw calculation data.
- NC values based on Octave Band 2 to 7 sound power levels minus a room absorption of 10 dB

- Dash (-) in space indicates NC value less than 10
- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006

## DAT-NT

- The Titus DAT-NT ceiling diffuser satisfies architectural as well as engineering criteria. Its smooth plaque face allows the diffuser to harmonize with the ceiling system, without sacrificing performance.
- The deep backpan of the DAT-NT was designed to ensure optimum performance without excessive noise or pressure drop
- The DAT-NT diffuser is an excellent choice for variable air volume systems. The air pattern remains tight and horizontal for effective room air distribution, even when the volume varies over a wide range.
- Compatible with 24 x 24" modules for regressed narrow tee ceiling systems
- Choice of one, two or three slots. Slot width is 1½".
- Diffuser has a round neck with a deep collar for easy connection to flexible duct
- Core is easily removable from face of the diffuser
- Material is heavy gauge steel

DAT-NT

### AVAILABLE MODEL:

DAT-NT / Supply

### FINISH

Standard Finish - #26 White

### OVERVIEW

Louvered Plaque / Narrow Tee / Steel

The DAT-NT ceiling diffuser satisfies architectural as well as engineering criteria. Its smooth plaque face allows the diffuser to harmonize with the ceiling system, without sacrificing performance. The deep backpan is designed for optimum performance without excessive noise or pressure drop, and is great for variable air volume applications.

Performance notes appear at end of performance data

See website for Specifications

## DIMENSIONS

### DAT-NT UNIT DIMENSIONS

| Ceiling Module | Number of Slots | Nominal Round Duct Size B | Plaque Face C |
|----------------|-----------------|---------------------------|---------------|
| 24 x 24        | 1               | 6, 8, 10                  | 19            |
|                | 2               | 6, 8, 10, 12              | 16            |
|                | 3               | 8, 10, 12, 14             | 13            |

## MB-30 / MBR-30

- Titus Modu-Bloc diffusers, Models MB-30 and MBR-30, are designed to be visually pleasing while providing superior performance
- Designed so that a ceiling tile (by others) can be field cut and inserted in the face of the diffuser. The center panel of Model MB-30 matches the surrounding ceiling tiles. This results in a smooth, clean appearance that blends with the ceiling.
- Supply diffuser delivers a one-, two-, three- or four-way horizontal throw or a vertical throw. With horizontal throw, the blanket of air is held tight against the ceiling even with varying volumes of air, making the MB-30 an excellent choice for VAV systems.
- Uniform, unbroken flow pattern guards against ceiling smudging
- Discharge patterns are individually adjustable for each slot, resulting in combinations that fit the distribution requirements of the room
- Fits 24 x 24" ceiling grid

### AVAILABLE MODELS:

MB-30 / Supply  
MBR-30 / Return  
MBI-30 / Supply / Internal Insulation

### FINISH

Standard Finish - #26 White

### OVERVIEW

#### ModuBloc Series

Titus Modu-Bloc diffusers are designed to be visually pleasing while providing superior performance. The Modu-Bloc is constructed so that a ceiling tile can be field cut and inserted in the face of the diffuser. This results in a smooth, clean appearance that blends with the ceiling.

### ADDITIONAL FEATURES

- Discharge directions are adjustable through 180°. Titus Modulinear pattern controllers in each slot controls not only the direction of airflow, but also the volume of air.
- Choice of one, two, three or four slots
- Choice of 3/4- or 1" slots
- Supply diffuser has a round neck with a deep collar for easy connection to flexible duct
- Optional external insulation on the supply diffuser (Model MBI-30)
- Model MBR-30 return is similar to the supply diffuser in appearance, but is built without the pattern controllers and backpan. Designed for plenum return, the MBR-30 has a light shield to prevent see-through and to block stray light from fixtures in the plenum.
- Material is extruded aluminum face. Steel backpan or light shield, steel pattern controllers

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the section Engineering Guidelines for additional information.
- If the diffuser is mounted on an exposed duct, the throw values are 70% of those listed in the table
- Throw values given are for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions. See the section Engineering Guidelines for the catalog throw data information.
- NC values based on octave band 2 to 7 sound power levels minus a room absorption of 10 dB
- Each NC value represents the noise criteria curve that will not be exceeded by the sound pressure in any of the octave bands, 2 through 7, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- Dash (-) in space denotes an NC value of less than 10
- All pressures are given in inches of water
- To obtain static pressure, subtract the velocity pressure from the total pressure

- Data obtained per ANSI/ASHRAE Standard 70-2006

## MB-30-NT / MBR-30-NT

- The MB-30-NT and MBR-30-NT Modu-Bloc diffusers are visually pleasing while providing superior performance
- The MB-30-NT and MBR-30-NT are designed to allow an existing ceiling tile to be field cut and inserted into the face of the diffuser. This results in a smooth, clean appearance that blends with the ceiling.
- Pattern controllers adjust volume and discharge direction of the MB-30-NT
- Available in one, two, three, or four slots
- Face is aluminum, backpan is steel
- Optional internal insulation

### OVERVIEW

ModuBloc Series / Narrow Tee

Titus Modu-Bloc diffusers are designed to be visually pleasing while providing superior performance. The Modu-Bloc is constructed so that a ceiling tile can be field cut and inserted in the face of the diffuser. This results in a smooth, clean appearance that blends with the ceiling.

For Performance Data and Notes, please refer to pages F146-F148.

## TSW

- Model TSW 'Swirl' ceiling diffuser is designed to provide a tight 360° circular pattern
- The TSW provides excellent performance in variable air volume systems
- The Inlet collar is 1 7/8 inches deep to allow for easy duct connection
- Optional damper can be adjusted with screwdriver through center hole in diffuser without removing face
- The TSW is constructed of heavy gauge steel

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the section, Engineering Guidelines of this catalog for additional information.
- Throw values given are for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions. See the section, Engineering Guidelines for the catalog throw data information.
- Each NC value represents the noise criteria curve that will not be exceeded by the sound pressure in any of the octave bands, 2 through 7, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- Dash (-) in space denotes an NC value of less than 10
- All pressures are given in inches of water
- To obtain static pressure, subtract the velocity pressure from the total pressure

## Architectural Ceiling Diffusers (continued)

### Spectrum

- Unique architectural face design with center appliqué (nine standard colors)
- Customer color matches and company logos available
- Appliqué sold separately for field application & retrofit
- Hinged removable faceplate is sold separately for retrofit of existing Titus perforated diffusers without removal of backpan or ductwork
- Excellent choice for VAV systems. The 4-way air pattern remains tight and horizontal even when the air volume varies over a wide range
- 24" x 24" module size with square or round inlets
- Border type 1 ships as border type 3 with separate TRM frame for easy mounting in surface mount applications
- Heavy gauge steel construction

Optional Finishes - Special colors and woodgrain finish options

#### OVERVIEW

##### Square Panel / Architectural Plaque Face

The Titus Spectrum diffuser offers a unique alternative when considering ceiling mounted air outlets for architectural building applications. The Spectrum design includes a special arcuate face with center appliqué. The appliqué is available in nine standard colors, as well as custom color matches or company logo. The versatility of these different color schemes provides the architect with a multitude of design options to compliment and enhance a building's décor. The Spectrum also provides excellent performance by delivering a tight 4-way horizontal air discharge pattern which make it a great choice for variable air volume applications. In addition to its architectural features, the Spectrum can also be used for retrofit applications with existing Titus perforated diffusers (PCS model). The removable arcuate face can be ordered separately to retrofit existing PCS diffusers in the field by removing the pattern controllers and replacing the face.

#### APPLIQUÉ INFORMATION

The Spectrum applique is constructed of matte substrate material with adhesive backing. Each appliqué is individually die cut for consistency and fitted to the pre-formed square embossment in the center of the

See website for Specifications

Spectrum diffuser installed in the ceiling of a conference room

Spectrum faceplate after the diffuser is painted. Appliqué specifications include a 0.017" polycarbonate substrate with opacity film, 0.002" adhesive with peel-off backing, and total thickness of 0.019".

#### COLOR OPTIONS

Titus offers nine standard appliqué colors for the Spectrum diffuser as well as custom colors or custom logo's. For the custom color matching process, two color chips (2" x 2") must be sent to Titus. For the custom logo process, a high resolution digital image must be supplied to Titus in a 3.96" x 3.96" viewing size.

PERFORMANCE NOTES

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006
- Throw values are in feet at terminal velocities of 150, 100 and 50 fpm at isothermal conditions
- For an explanation of catalog throw data, see the Engineering Guidelines section of this catalog
- NC values based on octave band 2 to 7 sound power levels minus a room absorption of 10 dB
- Each NC value represents the noise criteria curve that will not be exceeded by the sound pressure in any of the octave bands, 2 through 7, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- Dash (-) in space denotes an NC value of less than 10
- All pressures are given in inches of water
- To obtain static pressure, subtract velocity pressure from the total pressure

PERFORMANCE NOTES

- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006
- Throw values are in feet at terminal velocities of 150, 100 and 50 fpm at isothermal conditions
- For an explanation of catalog throw data, see the Engineering Guidelines section of this catalog
- NC values based on octave band 2 to 7 sound power levels minus a room absorption of 10 dB
- Each NC value represents the noise criteria curve that will not be exceeded by the sound pressure in any of the octave bands, 2 through 7, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- Dash (-) in space denotes an NC value of less than 10
- All pressures are given in inches of water
- To obtain static pressure, subtract velocity pressure from the total pressure

## Square and Rectangular Diffusers

### TDC / TDCA

- Titus Series TDC diffusers handle an unusually large amount of air for a given pressure drop and noise level
- Pleasing appearance harmonizes with various architectural details - especially modular ceiling systems
- Maintains an unbroken horizontal flow pattern from maximum cfm down to minimum. Excellent performance in variable air volume systems.
- In the TDCA and TDCA-AA models, movable vanes, accessible from the face, adjust the discharge pattern from horizontal to vertical
- Core is easily removable from the face of the diffuser
- Lever operator on the optional Model AG-95 damper allows easy volume adjustment from the face of the diffuser
- Extremely flexible, with cores available for 1-, 2-, 3- or 4-way horizontal flow
- Material is 22-gauge steel or aluminum with miscellaneous steel components

TDC / TDCA

- For a uniform face appearance on all neck sizes, specify an 18 x 18" dimension A size and the desired round neck size. This is available in 24 x 24" lay-in module size only.

### AVAILABLE MODELS:

Steel Models:  
TDC / with fixed discharge  
TDCA / with adjustable discharge

Aluminum Models:  
TDC-AA / with fixed discharge  
TDCA-AA / with adjustable discharge

### FINISH

Standard Finish - #26 White

### OVERVIEW

Louvered Face / High Capacity

Titus Series TDC diffusers handle an unusually large amount of air for a given pressure drop and noise level. Their pleasing appearance harmonizes with various architectural details, especially in modular ceiling systems.

Optional Patterns (continued)

## PERFORMANCE

- The table below shows the quantity and location of Model TRV vanes required per side of the diffuser
- Throw reduction will be shown in the isovel diagrams
- Total pressure will be 1.40 times that listed in the diffuser performance table
- Sound level will be 4 NC higher than that listed in the diffuser performance table

| Dimension X Inches                                                                  | Quantity of Model TRV Vanes Required (per Side) |   |    |    |    |    |    |    |    |    |    |

### PERFORMANCE NOTES

Available Models: TDC, TDC-AA, TDCA, TDCA-AA, TDV, TDV-AA

- All pressures are in inches of water. TP is total pressure, - SP is negative static pressure for return units.
- Throw values are given for terminal velocities of 150, 100, and 50 fpm. For an explanation of catalog throw data, see the section, Engineering Guidelines for catalog throw data.
- NC values are based on a room absorption of 10 dB, re 10<sup>-12</sup> watts, with one diffuser operating.
- If the diffuser is used as a return inlet, the following corrections apply:
  - Negative static pressure: Multiply the factor at the upper left corner of the performance table by the total pressure listed in the table
  - Sound: Add the NC correction at the upper left corner of the performance table to the NC value listed in the table
  - Return Performance Example: 6 x 6 Model TDC handling:  
150 cfm of return air  
-SP = 1.1(-TP).  
Return negative SP = 1.1 x (0.169)  
= - 0.1859 inches wg.  
Return NC = NC Table + 1  
Return NC = 23 + 1 = 24
- These products have been tested per ANSI/ASHRAE 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the section, Engineering Guidelines for additional information.
- Data in the tables apply when the diffuser is mounted nearly flush with the ceiling for maximum ceiling effect. When no ceiling effect is present, the horizontal throw will be about 25% less than shown in the tables. The mounting distance below the ceiling will also affect the downward projection angle as indicated in the diagram at upper right.

### RECOMMENDED MAXIMUM AIRFLOW

| Ceiling Height, ft.    | 8   | 9   | 10  | 12  | 15   | 20   |
|------------------------|-----|-----|-----|-----|------|------|
| Airflow, cfm, per Side | 200 | 350 | 550 | 900 | 1500 | 4000 |

Note: Although this data is based on a 20°F temperature differential during cooling, it also applies to any differential between 15°F and 25°F

### CORRECTIONS FOR MODEL TDCA (ADJUSTABLE PATTERN CONTROLLERS)

| Nominal Neck Size | NC (add) |   | Total Pressure (Multiply) |     | Vertical Throw (Multiply) |             |      |
|-------------------|----------|---|---------------------------|-----|---------------------------|-------------|------|
|                   |          |   |                           |     | Cooling<br>20 F           | Heating, ΔT |      |
|                   | H        | V | H                         | V   |                           | 0 F         | 20 F |
| 6 x 6             | 3        | 7 | 1.3                       | 1.6 | 1.3                       | 1.1         | 0.8  |
| 9 x 9             | 3        | 7 | 1.5                       | 2.3 | 1.4                       | 1.2         | 0.72 |
| 12 x 12           | 3        | 7 | 1.5                       | 2.3 | 1.5                       | 1.25        | 0.65 |
| 15 x 15           | 3        | 7 | 1.5                       | 2.3 | 1.55                      | 1.27        | 0.62 |
| 18 x 18           | 3        | 7 | 1.5                       | 2.3 | 1.6                       | 1.3         | 0.59 |
| 21 x 21           | 3        | 7 | 1.5                       | 2.3 | 1.65                      | 1.35        | 0.57 |
| 24 x 24           | 3        | 7 | 1.5                       | 2.3 | 1.1                       | 1.1         | 0.55 |

Note: TDC and TDV Performance Data were obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006

### MODEL TDCA PERFORMANCE

- For Model TDCA diffusers (adjustable pattern controllers) apply the corrections from the table at the right to the TDC data for square neck, 4-way core styles, as follows:
  - TP = Listed value x correction
  - NC = Listed value + correction
  - Throw = Listed value x correction

- Vertical adjustments are most effective with the above sizes, using an A4 pattern
- Vertical throw will not work with round inlets

Apply the throw factor to the 50 fpm terminal velocity throw only.

## TDC-NT / TDC-AA-NT

- The TDC-NT is an extremely flexible, high capacity ceiling diffuser that can meet a wide range of applications. It is an excellent choice for variable volume applications because it maintains a horizontal air pattern from maximum to minimum cfm.
- Choose from 1-, 2-, 3- or 4-way cores
- Available in sizes from 6 x 6 inches up to 18 x 18 inches, in 3" increments
- Material is heavy gauge steel

TDC-NT / TDC-AA-NT

## AVAILABLE MODELS:

TDC-NT / Steel  
TDC-NT-AA / Aluminum

## FINISH

Standard Finish - #26 White

## OVERVIEW

Louvered Face / Narrow Tee

Titus Series TDC diffusers handle an unusually large amount of air for a given pressure drop and noise level. Their pleasing appearance harmonizes with various architectural details, especially in modular ceiling systems.

See website for Specifications

## DIMENSIONS

### TDC-NT / TDC-AA-NT UNIT DIMENSIONS

All dimensions are in inches

## TDV / TDV-AA

- Titus Model TDV and TDV-AA are high capacity ceiling diffusers. These diffusers maintain an unbroken horizontal flow pattern from maximum cfm down to minimum, it is an excellent choice for variable air volume application.
- The Titus TDV and TDV-AA have louvered faces with integrated induction vanes for exceptional air mixing
- Slot operator on the optional Model AG-95 damper allows easy volume adjustment. (Rectangular necks only)
- Core is easily removable from the face of the diffuser
- Model TDV is extremely flexible, with cores available for 1-, 2-, 3- or 4-way horizontal flow
- Material heavy gauge steel or aluminum
- For a uniform face appearance on all neck sizes, specify an 18 x 18" dimension A size and the desired round neck size. This is available in 24 x 24" lay-in module size only.

TDV / TDV-AA

### AVAILABLE MODELS:

TDV / Steel  
TDV-AA / Aluminum

### FINISH

Standard Finish - #26 White

### OVERVIEW

#### Louvered Face / Induction Vanes

Titus Model TDV and TDV-AA are high capacity ceiling diffusers with louvered faces and integrated induction vanes for exceptional air mixing. They maintain an unbroken horizontal flow pattern from maximum cfm down to minimum and are an excellent choices for variable air volume applications.

| 12 x 12               | 6 x 6               | 6 x 6               |
| 24 x 24               | 6 x 6               | 18 x 18             |
| 48 x 24               | 12 x 12             | 42 x 18 (note 3)    |

Note 1: Duct sizes are available in 3" increments only  
Note 2: Maximum duct size for border 5 is 36" x 36". Maximum duct size for TDV-AA is 36" x 36".  
Note 3: Maximum duct size for TDV-AA is 36" x 18"

AVAILABLE DUCT SIZES - ROUND NECKS

| Border Types 1, 5, 6 |                           |
|----------------------|---------------------------|
| Dimension A          | Available Round Duct Size |
| 6 x 6                | 6                         |
| 9 x 9                | 6, 8                      |
| 12 x 12              | 6, 8, 10, 12              |
| 15 x 15              | 6, 8, 10, 12, 14          |
| 18 x 18              | 6, 8, 10, 12, 14, 16      |

| Border Types 2, 3, 4  |             |                           |
|-----------------------|-------------|---------------------------|
| Available Module Size | Dimension A | Available Round Duct Size |
| 12 x 12               | 6 x 6       | 6                         |
| 24 x 24               | 6 x 6       | 6                         |
|                       | 9 x 9       | 6, 8                      |
|                       | 12 x 12     | 6, 8, 10, 12              |
|                       | 15 x 15     | 6, 8, 10, 12, 14          |
|                       | 18 x 18     | 6, 8, 10, 12, 14, 16      |

Note: Round duct sizes are available only in sizes shown

- All pressures are in inches of water
- Throw velocities given are for isothermal terminal velocities of 150, 100 and 50 fpm. See the section, Engineering Guidelines for additional information.
- NC values based on Octave Band 2 to 7 sound power levels minus a room absorption of 10 dB
- Dash (-) in space denotes an NC value less than 10
- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006
- Throw values given are for isothermal conditions

- All pressures are in inches of water
- Throw velocities given are for isothermal terminal velocities of 150, 100 and 50 fpm. See the section, Engineering Guidelines for additional information.
- NC values based on Octave Band 2 to 7 sound power levels minus a room absorption of 10 dB
- Dash (-) in space denotes an NC value less than 10
- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006
- Throw values given are for isothermal conditions

- All pressures are in inches of water
- Throw velocities given are for isothermal terminal velocities of 150, 100 and 50 fpm. See the section, Engineering Guidelines for additional information.
- NC values based on Octave Band 2 to 7 sound power levels minus a room absorption of 10 dB
- Dash (-) in space denotes an NC value less than 10
- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006
- Throw values given are for isothermal conditions

- All pressures are in inches of water
- Throw velocities given are for isothermal terminal velocities of 150, 100 and 50 fpm. See the section, Engineering Guidelines for additional information.
- NC values based on Octave Band 2 to 7 sound power levels minus a room absorption of 10 dB
- Dash (-) in space denotes an NC value less than 10
- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006
- Throw values given are for isothermal conditions

## TDV-NT / TDV-AA-NT

- Titus Models TDV-NT and TDV-AA-NT are high capacity ceiling diffusers for use in narrow tee regressed ceilings. These diffusers maintain an unbroken horizontal airflow pattern from maximum cfm down to minimum, which makes them excellent choices for variable air volume application.
- They have louvered faces with integrated induction vanes for exceptional air mixing
- Slot operator on the optional Model AG-95 damper allows easy volume adjustment (Rectangular necks only)
- Core is easily removable from the face of the diffuser
- Model TDV-NT is extremely flexible, with cores available for 1-, 2-, 3- or 4-way horizontal flow patterns
- Material heavy gauge steel or aluminum
- For a uniform face appearance on all neck sizes, specify an 18 x 18" dimension A size and the desired round neck size. This is available in 24" x 24" lay-in module size only.

TDV-NT / TDV-AA-NT

### AVAILABLE MODELS:

TDV-NT / Steel  
TDV-AA-NT / Aluminum

## Square and Rectangular Ceiling Diffusers (continued)

### TDX / TDX-AA

- The Titus TDX and TDX-AA have louvered faces with integrated induction nozzles for exceptional air mixing
- Model TDX is a high capacity ceiling diffuser that maintains a continuous horizontal flow from maximum cfm down to minimum cfm, making it an excellent choice for variable air volume applications
- Model TDX is extremely flexible, with cores available for 1-, 2-, 3- or 4-way horizontal flow
- Core is easily removable from the face of the diffuser
- Slot operator on the optional Model AG-95 damper allows easy volume adjustment (Square necks only)
- Material is heavy gauge steel or aluminum with miscellaneous steel components
- For a uniform face appearance on all round neck sizes, specify an 18 x 18" dimension 'A' size and the desired round neck size. This is available in 24" x 24" lay-in module size only.

Troom = 75°F  
Tsupply = 55°F

Induction Ratio =  $[(Troom - Tsupply)/(Troom - Tthrow)] - 1$   
(250 cfm, 12 x 12, A4 Pattern)

**Notes:**

'x' Data taken 1" below ceiling.

Temperature: Room 75°F, Supply 55°F.

At 55°F supply air, jet temperature from the TDX increases more rapidly than from the TDC and TDV, illustrating the effect of induction performance with this diffuser.

Elevation views shown above demonstrate the ability of the TDX to provide greater temperature equalization in the occupied space. This provides for an extremely high ADPI lever which translates into an exceptional comfort for occupants.

- All pressures are in inches of water
- Throw velocities given are for isothermal terminal velocities of 150, 100 and 50 fpm. See the section, Engineering Guidelines for additional information.
- NC values based on Octave Band 2 to 7 sound power levels minus a room absorption of 10 dB
- Dash (-) in space denotes an NC value less than 10
- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006
- Throw values given are for isothermal conditions

- All pressures are in inches of water
- Throw velocities given are for isothermal terminal velocities of 150, 100 and 50 fpm. See the section, Engineering Guidelines for additional information.
- NC values based on Octave Band 2 to 7 sound power levels minus a room absorption of 10 dB
- Dash (-) in space denotes an NC value less than 10
- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006.
- Throw values given are for isothermal conditions

- All pressures are in inches of water
- Throw velocities given are for isothermal terminal velocities of 150, 100 and 50 fpm. See the section, Engineering Guidelines for additional information.
- NC values based on Octave Band 2 to 7 sound power levels minus a room absorption of 10 dB
- Dash (-) in space denotes an NC value less than 10
- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006
- Throw values given are for isothermal conditions

- All pressures are in inches of water
- Throw velocities given are for 20° cooling at terminal velocities of 150, 100 and 50 fpm. See the section, Engineering Guidelines for additional information.
- NC values based on Octave Band 2 to 7 sound power levels minus a room absorption of 10 dB
- Dash (-) in space denotes an NC value less than 10
- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006
- Throw values given are for cooling conditions

- All pressures are in inches of water
- Throw velocities given are for 20° cooling at terminal velocities of 150, 100 and 50 fpm. See the section, Engineering Guidelines for additional information.
- NC values based on Octave Band 2 to 7 sound power levels minus a room absorption of 10 dB
- Dash (-) in space denotes an NC value less than 10
- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006
- Throw values given are for cooling conditions

## TDX-NT / TDX-AA-NT

- The Titus TDX-NT and TDX-AA-NT have louvered faces with integrated induction nozzles for exceptional air mixing
- Models TDX-NT and TDX-AA-NT are high capacity ceiling diffusers for use in narrow tee regressed ceilings. These diffusers maintain an unbroken horizontal airflow pattern from maximum cfm down to minimum, which makes them excellent choices for variable air volume application.
- Model TDX-NT is extremely flexible, with cores available for 1-, 2-, 3- or 4-way horizontal flow
- Core is easily removable from the face of the diffuser
- Slot operator on the optional Model AG-95 damper allows easy volume adjustment (Square necks only)
- Material is heavy gauge steel or aluminum with miscellaneous steel components
- For a uniform face appearance on all round neck sizes, specify an 18 x 18" dimension 'A' size and the desired round neck size. This is available in 24" x 24" lay-in module size only.

TDX-NT / TDX-AA-NT

### AVAILABLE MODELS:

TDX-NT / Steel  
TDX-AA-NT / Aluminum

### FINISH

Standard Finish - #26 White

### OVERVIEW

Louvered Face / Induction Nozzles / Narrow Tee

The Titus TDX-AA and TDX-AA-NT have louvered faces with integrated induction nozzles for exceptional air mixing. These models are high capacity ceiling diffusers that maintain a continuous horizontal flow from maximum cfm down to minimum cfm, making them an excellent choice for variable air volume applications.

See website for Specifications

## DIMENSIONS

Border Type NT  
Square Neck

## Adjustable Ceiling Diffuser

diffusers

### 250 / 250-AA

- Titus Models 250 and 250-AA present a clean, functional, strong appearance, along with high performance
- Designed for ceiling, high side wall, and low side wall installations
- Excellent for variable air volume applications
- For Border Type 1, the one-way discharge pattern is available in duct sizes 6" x 4" through 36" x 36". The two-, three-, and four-way patterns are available in duct sizes 6" x 6" through 36" x 36".
- Louvers are individually adjustable from the face of the diffuser. The louvers regulate the air volume as well as the angle of discharge.
- Optional Model AG-15 opposed blade damper has a screwdriver adjustment accessible through the face of the diffuser. Mounts on the neck of the diffuser.
- Optional Model AG-20 multi-louver damper has an adjusting lever at the face of the diffuser. Mounted on the diffuser at the factory. Steel, finished to match the diffuser.
- Diffuser material is steel in Model 250, aluminum with miscellaneous steel components in Model 250-AA.

250 / 250-AA

#### AVAILABLE MODELS:

250 / Steel  
250-AA / Aluminum

#### FINISHES

Standard Finish - #26 White  
Optional Finish - #01 Aluminum

#### OVERVIEW

Adjustable 1-, 2-, 3-, or 4-way Discharge Pattern

Titus Models 250 and 250-AA present a clean, functional, strong appearance, along with high performance. They are designed for ceiling, high side wall, and low side wall installations and are available in 1, 2, 3 or 4-way configurations.

See website for Specifications

## DIMENSIONS

### 250 / 250-AA UNIT DIMENSIONS

Note: Maximum duct size is 36 x 36 inches for Border Type 1.

#### Border Type 3 - Standard Duct Sizes

- 6 x 6
- 8 x 8
- 9 x 9
- 10 x 10
- 12 x 12
- 14 x 14
- 15 x 15
- 16 x 16
- 18 x 18
- 21 x 21

## Optional Discharge Patterns

Note: For square diffusers (height = width), specify L1, L2, L2C, L3, L4, S1, S2, S2C, S3 or S4

Patterns are shown looking at the diffuser face

- Models 250 and 250-AA diffusers can be ordered in any of the discharge patterns shown in the diagrams at the right
- Because the louvers are individually adjustable, each direction of discharge can have its own volume and angle of discharge, all from one diffuser
- The preceding performance tables show values for the various discharge patterns

250, 250-AA / ADJUSTABLE, 1-, 2-, 3- OR 4-WAY DISCHARGE PATTERN

NC-50

- All pressures are in inches of water
- Throw values given are for terminal velocities of 150, 100 and 50 fpm along a surface. The throw may be increased or decreased as much as 20% by changing the louver setting.
- NC values based on a room absorption of 10 dB, re 10<sup>-12</sup> watts
- Blank areas denote NC values less than 10 and cfm values less than 50
- Black dividing lines denote ranges of NC values
- Performance data is based on an approximate 1/8" opening between the border and the adjacent louver, with progressively wider spacings between louvers further away from the border. This setting discharges air parallel to the diffusers face (horizontal discharge, if installed in a ceiling).
- See the section, Engineering Guidelines for additional throw information
- If all the louvers are adjusted to the full open position, the listed NC values will be reduced by 7, the total pressure will be 0.30 times those shown in the tables and the throw will be a vertical free jet
- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the section, Engineering Guidelines additional information.

## TBF-AA (TURBOFUSER)

- Titus TurboFuser series TBF-AA diffuser provides precise control of high capacity jets
- The TurboFuser is a versatile diffuser for demanding spot cooling and heating HVAC applications, such as industrial or large open areas
- An aesthetic alternative to conventional air distribution providing a contemporary look for sports complexes, atriums and lobbies
- Material is heavy-duty aluminum
- Deep deflection rings in each nozzle for maintaining directional control at high velocities up to 30 degrees in any direction
- Nozzle sizes are 6", 8", 10", 12" and 14", with up to four nozzles per panel
- Each ring of the nozzle assembly is 1-piece spun construction

### AVAILABLE MODEL:

TBF-AA / Aluminum

### FINISH

Standard Finish - #26 White

### OVERVIEW

#### Panel-Mounted Nozzles

TurboFuser series TBF and TBF-AA diffusers provide precise control of high capacity jets. This is a versatile diffuser for demanding spot cooling and heating applications, such as industrial or large open areas. It also offers an aesthetic alternative to conventional air distributing providing a contemporary look for sports complexes, atriums and lobbies.

## DIMENSIONS

### TBF-AA UNIT DIMENSIONS

| Nozzle Size (inches) | NOM Duct Height | Width by Number of Nozzles |    |    |    |
|----------------------|-----------------|----------------------------|----|----|----|
|                      |                 | 1                          | 2  | 3  | 4  |
| 6                    | 10              | 10                         | 19 | 28 | 37 |
| 8                    | 12              | 12                         | 23 | 34 | 45 |
| 10                   | 14              | 14                         | 27 | 40 | 53 |
| 12                   | 16              | 16                         | 31 | 46 | 61 |
| 14                   | 18              | 18                         | 35 | 52 | 69 |

#### Typical Installation

TBF-AA / PANEL-MOUNTED NOZZLES

- All pressures given are in inches of water
- Throw values given are for terminal velocities of 150, 100 and 50 fpm and for isothermal conditions. See the section, Engineering Guidelines for additional throw information.
- The throw values listed are with ceiling effect
- To obtain static pressure, subtract the velocity pressure from the total pressure
- If the diffuser is mounted on an exposed duct, the throw values are 70% of those listed in the table and will project downward
- Each NC value represents the noise criteria curve that will not be exceeded by the sound pressure in any of the octave bands, 2nd through 7th, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- Dash (-) in space denotes an NC value of less than 10
- Data obtained from tests conducted in accordance with ANSI/ASHRAE Standard 70-2006. Actual performance, with flexible duct inlet, may vary in the field. See the section, Engineering Guidelines for additional information.

## TND-AA

- Designed to handle large air capacity requirements and provide concentrated long throws
- Round nozzles are adjustable within mounting ring to 38°
- Duct or hard surface mountable
- Well suited for installations where the conditioned space is large, and where it is impractical to bring the duct work close to the occupants
- Optional aperture volume damper accessible on face of nozzle
- Extruded aluminum / aluminum construction

### AVAILABLE MODEL:

TND-AA / Aluminum

### FINISHES

Standard Finish - #26 White

Optional Finishes - #01 Aluminum / #84Black

### OVERVIEW

#### Nozzle Diffuser

The Titus TND-AA diffusers are an excellent choice for applications that require large volumes of air with either directed and/or concentrated shots. Ideally suited for theaters, shopping malls, auditoriums, gyms and industrial applications. The TND-AA provides a 0 to 38 ° adjustable discharge with optional aperture damper for volume control.

- All pressures given are in inches of water
- Throw values given are for terminal velocities of 200, 100 and 50 fpm and for isothermal conditions. See the section, Engineering Guidelines for additional throw information.
- The throw values listed are without ceiling effect
- For throw values with ceiling effect apply a correction factor of 1.4
- To obtain static pressure, subtract the velocity pressure from the total pressure
- Each NC value represents the noise criteria curve that will not be exceeded by the sound pressure in any of the octave bands, 2nd through 7th, with a room absorption of 10 dB, re 10<sup>-12</sup> watts
- Dash (-) in space denotes an NC value of less than 20
- Actual performance, with flexible duct inlet, may vary. See the section, Engineering Guidelines for additional information.

## Concentric Supply / Return Diffusers

diffusers

### CSR / CSR-P

- The Titus CSR Series is designed to maximize the performance of a combine supply/return diffuser
- Supply and return air is handled through one air device
- The CSR and CSR-P are compatible with unitary package equipment from 2½ to 25 tons
- The CSR-P shown in the figure is ideal for applications requiring a system that provides equal distribution on all four sides while maintaining low noise levels. It may be installed in a T-bar ceiling or plaster ceiling, or duct mounted in an open area.
- Features and benefits of the CSR and CSR-P diffusers include:
  - » Four-way horizontal airflow
  - » Low noise, low pressure performance
  - » Anti-smudging characteristics
  - » Aluminum diffuser and return air eggcrate
  - » Lightweight design
  - » Built-in hanging support for easy installation

CSR / CSR-P

- Large commercial buildings, warehouses, and retail stores will find the CSR-P the prime selection for single point air distribution systems. Titus provides the entire plenum and diffuser in one piece. The assembled CSR-P unit makes for an easy, low cost installation.

#### AVAILABLE MODELS:

CSR / without Plenum  
CSR-P / with Plenum

See website for Specifications

#### FINISH

Standard Finish - #26 White

#### OVERVIEW

Combination Supply / Return / High Capacity

The Titus CSR Series is designed to maximize the performance of a combination supply/return diffuser. Supply and return air is handled through one air device.

- NC based on a room, 68 x 80 x 14 feet with the receiver located 9 feet from the diffuser
- Total System Static Pressure is the sum of the supply static pressure and the return static pressure
- Throw is listed as the distance in feet to terminal velocities of 150, 100 and 50 fpm under isothermal conditions
