

# **Motor Run Capacitors**

# **HCK Series**

A run capacitor, also known as a start capacitor, boosts the current or reduces the power factor to an electrical motor. Common applications include HVAC, pool and spa, motors, food service and electronics. Our engineers and quality specialists provide services that meet or exceed customer requirements—all capacitors undergo in-house testing and validation. We carry extensive domestic inventory to meet delivery schedules.

# **Features**

- · Single and dual rated values
- Round or oval case options
- · Aluminum oil filled construction
- Designed & manufactured in accordance with UL 810 and EIA standard RS-456
- Custom configurations available

# Specifications

## **Rated Voltage**

370 and 440 VAC (contact factory for alternative voltages)

**Operating Temperature** 

-40°C to 70°C

**Dissipation Factor** 

0.1% max.

#### **Internal Protection**

0.1% max.

UL recognized internal protection bridge capable of interrupting up to 10K amp

## **Capacitance Tolerance**

3% available

**Leakage Current** 

30 μA max.

**Frequency** 

50/60 Hz

# **Operating Life**

22,000 hour with 94% survival 60,000 hours available

### **Terminations**

.250" x .032" QC terminals

#### Case Material/Finish

Unpainted aluminum construction

We can custom engineer a solution to meet any need. Just ask.
