## Pressure Reducing Control

| Size<br>(inch)       | Stock<br>Number       | Adjustment Range |             |
|----------------------|-----------------------|------------------|-------------|
|                      |                       | psi              | Ft of Water |
| 3/8                  | 71943-07A             | 2 - 6.5          | 4.5 - 15    |
| 3/8                  | 71943-08J             | 2 - 30           | 4.5 - 69    |
| 3/8                  | 71943-03K             | 15 - 75          | 35 - 173    |
| 3/8                  | 71943-11C             | 20 - 105         | 46 - 242    |
| 3/8                  | 71943-04H             | 30 - 300         | 69 - 692    |
| Factory Set Pressure |                       | PSI per Turn*    |             |
|                      | 2 - 6.5 set @ 3.5 psi | .61              |             |
|                      | 2 - 30 set @ 10 psi   | 3.0              |             |
|                      | 15 - 75 set @ 20 psi  | 9.0              |             |
|                      | 20 - 105 set @ 60 psi | 12.0             |             |
|                      | 30 - 300 set @ 60 psi | 27.0             |             |

\*Approximate-Final Adjustment should be with a pressure gauge and with flow.

### When ordering parts specify:

- All nameplate data
- Item Description
- Item number

| Item | Description                             | Material | Part Number | List Price |
|------|-----------------------------------------|----------|-------------|------------|
| 1    | Cap                                     | PL       | 67628J      |            |
